TENNESSEE YMCA MODEL UNITED NATIONS RULES OF PROCEDURE FOR THE GENERAL ASSEMBLY

I: General Rules

- A. **AGENDA** – The agenda of the General Assembly is drawn up by the Center for Civic Engagement (CCE) and shall be regarded as adopted at the beginning of the session. There shall be no revisions or additions to the agenda without approval of the CCE staff.
- B. **OFFICERS:** the Presidents of the General Assembly and the Vice-Presidents shall be the presiding officers of the General Assembly and its Plenary session. Other conference officers or delegates may be called on to preside over committee sessions only with direction from the CCE staff.
- C. **RESPONSIBILITIES OF OFFICERS:**
 - a. Declare the opening and closing of each plenary session.
 - b. Moderate the discussion in plenary session.
 - c. Uphold these rules of procedure.
 - d. Uphold the expectations set forth in the Officer Code of Conduct.
- D. **LANGUAGES** – All sessions shall be conducted in English. Any participant wishing to address the session in another language may do so, provided he/she brings his/her own interpreter.
- E. **QUORUM:** Two-thirds (67%) of the assigned delegates shall constitute a quorum of the General Assemblies, Plenary session, and committees. A quorum must be present for any session to conduct the business on its agenda.
- F. **DECORUM:** All delegates are expected to maintain decorum, i.e. appropriate behavior, during all sessions. Delegates behaving inappropriately are subject to disciplinary action by presiding officers and the CCE staff. The Delegate Code of Conduct defines further expectations for appropriate delegate behavior.

II. General Assembly (GA) sessions:

- A. **Docket:** the docket for GA sessions shall be determined by the CCE staff based on rankings of resolutions by committees. The docket for each GA session is only amended in extraordinary circumstances with the permission of the CCE staff and presiding officers (the chairs). Delegates who wish to amend the docket (i.e. reschedule the debate on a resolution) should bring their concerns to the presiding officers before moving to amend the docket.

B. Resolutions:

- a. The content of resolutions should conform to the expectations laid out by the CCE staff in the Delegate Manual.
- b. Resolutions may **only** be amended during committee sessions.

C. Presentations:

- a. The patrons of each resolution are responsible for presenting their resolution to the GA according to the rules of procedure and decorum and the format for debate. Only GA delegates can present resolutions to the GA.
- b. Patrons should not use props of any kind during their presentations or the debate on their resolutions.
- c. Patrons may invoke **Patron's Rights** only when a speaker in debate has offered factually incorrect information about the text of their resolution. Patron's Rights allows the patrons ten seconds of uninterrupted speaking time to correct the factual error. Patrons must wait until the speaker has concluded their remarks before exercising these rights.

D. Debate:

- a. GA Delegates may speak only when recognized by the chair. Delegates' remarks must be relevant to the items on the agenda at any given time.
- b. Delegates may only speak in the GA to which they are assigned.
- c. Once recognized, delegates must identify themselves to the session with their name and the country they represent.
- d. Delegates recognized as speakers in debate have the right to do **two** of the following things with their speaker's time. Speakers must inform the chair of their intentions before continuing to:
 - i. Address the floor/session
 - ii. Ask the patrons of the resolution a series of questions
 - iii. Yield the remainder of their time to another delegate in the session
 - iv. Make a motion. Motions should be made after one of the previous actions.
- e. Speaker's time: unless otherwise indicated by the chair, each speaker shall have one minute to address the floor. Speakers who have been yielded time by another delegate may not yield any further time. Unused speakers' time shall be yielded to the chair.

E. Motions & Incidental Motions: delegates must be recognized by the chair to make motions or incidental motions.

F. Intent Speeches: delegates and members of the Secretariat may submit intent speeches during debate on resolutions during GA and the Plenary sessions.

- a. Intent speeches are limited to 2 minutes and are delivered between the end of technical questions on the resolution and the beginning of debate on the resolution.
- b. Intent speeches may only address the floor/session; intent speakers must identify themselves and request permission to address the floor.
- c. Intent speakers may not yield their time to another delegate, ask the patrons questions, or make a motion.
- d. Intent speeches do not count as rounds of debate.
- e. Delegates may only deliver one intent speech during the conference.

G. Voting:

- a. When voting on GA resolutions, each delegation has one vote, including the delegation presenting the resolution. GA resolutions pass with a simple majority, i.e. more 'ayes' than 'nays.'
- b. Delegations may abstain on resolutions only when the abstention follows current policy positions of their government.
- c. When voting on all other motions, each delegate has one vote. The majority required is found on the Table of Motions in the resolution book and the Delegate Manual.
- d. During voting procedure, delegates may not leave or enter the GA session until the results of the voting have been determined by the chair.

H. Amendments:

- a. GA Delegates may propose, debate, and vote on amendments only in GA committees. Amendments require a simple majority to pass.
- b. Patrons of resolutions may submit simple amendments to their own resolution before beginning their presentation. Such amendments should not change the nature or intent of the resolution, but make simple corrections. Once they have begun their presentation, patrons may not submit amendments to their own resolution.
- c. Any amendments must be written on the appropriate form, be legible, and be germane.
- d. Amendments must be recognized by the chair before the final round of debate, i.e. before the chair has recognized the last "pro" speaker for the debate.
- e. The patrons of the resolution must declare any amendment "friendly" (if they agree with the proposed amendment) or "unfriendly" (if they disagree).
- f. Friendly amendments may be passed without debate through voice acclamation.
- g. Unfriendly amendments are debated in the appropriate format. The amendment's sponsor acts as the patron of the amendment, and the patrons of the resolution have the right to be the first con speaker in the debate.

BRIEF DEFINITIONS:

Adjourn: this action ends the session and is only in order with the permission of the CCE staff.

Appeal: a legislative body may appeal a decision of its presiding officer if 2/3 of its members think that the chair has made an incorrect ruling on a procedural matter.

Reconsider: motions to reconsider any motion are only in order with the permission of the CCE staff.

Point of Personal Privilege: this point should be used to address delegates' comfort or ability to participate in the conference session, i.e. climate control issues, PA volume, etc.

Suspension of the Rules: a successful motion to suspend the rules affects only the main motion at hand. Suspended rules are 'back' once voting/ranking procedures are complete.

Point of Information: these points are questions directed to the chair for factual information relevant to the debate at hand. The chair may redirect the question to a delegate who is likely to have an answer.

Point of Order: these points are questions directed to the chair asking for clarification of rules of procedure.

SCRIPT FOR CCE MUN DEBATE

BY TUCKER COWDEN, MHMS

*Outside of this guide, consult additional TN YMCA CCE supplements and Robert's Rules of Order

*Script is written with the assumption of more than one patron for the resolution/bill. If there is only one presenting patron, change statements to the singular (i.e. "Does the Patron" instead of "Do the Patrons").

OVERVIEW

Model UN (MUN) debate should be seen in the context of the actual United Nations General Assembly, where delegates speak directly on behalf of the governments of the nations they represent and the items debated are called **resolutions**. Because of this setting, MUN delegates should know their nation's stance on important world issues and approach them as that country's government would (even if the delegates do not agree with that approach). This applies especially to the resolution that you are presenting. It should address not only an issue that the delegates think is important, but one that the country's government thinks is important and would actually present to the UN. Also, although the event is called "Model UN," speakers referring to the body should not say that "the Model UN" should do such-and-such. You are to be completely in character, acting as if Model UN were the actual United Nations (so refer to the conference as "the UN" or "the United Nations").

ASKING TECHNICAL QUESTIONS

(after being recognized by the chair)

Speaker: [States Name, States Country, States **One** Question (must be one that merits a response of yes, no, a number, a definition, or a short, expository rather than persuasive answer) (the question is directed to the presenting delegates)]

CON/PRO DEBATE

(after being recognized)

*Delegates may take one or two of the three actions listed below (ask questions, speak to the floor, yield time to another delegate), but may not only yield time to another delegate (you can only ask questions or only speak, but cannot only yield time).

Speaker: (States Name, States Country) and...

- To Ask A Series of Questions

Speaker: Do the Patrons yield to a possible series of questions? (**Not:** “a series of possible questions,” or “a question.”)

Chair: They do so yield

Speaker: (To Patrons) (Asks Questions and receives answers for up to two minutes, depending on the committee/GA/plenary’s time structure).

*It is important to note that questions asked as a Con speech should seek to criticize, or at least show skepticism for, the given resolution. Those asked as a Pro speech should do the opposite, emphasizing the positive aspects of the resolution.

- To Address the Assembly

Speaker: May I address the floor?

Chair: That is your right.

Speaker: (Speaks to fellow delegates, not the patrons, for the allotted amount of time either in favor of (pro speech) or against (con speech) the resolution).

*You should never use the words “Con” or “Pro” in your speech unless referring to “a previous con speaker,” etc. Con and Pro are not nouns or verbs that can be used to show your support or dislike of a resolution (so **do not** say “I con this resolution”).

- To Yield Remaining time after one of the above to a fellow delegate:

Speaker: May I yield the remainder of my time to a fellow delegate?

Chair: That is your right. Please specify a delegate.

Speaker: [Names the delegate to be yielded to (refer to him/her by country)] (Takes first action)

*Delegates being yielded to should have the same opinion (pro or con) on the resolution as the speakers that yield to them.

MOTIONS

(must be made before the last con speech)

Speaker: (Shouts) Motion!

Chair: Rise and state your motion.

Speaker: (States Name, States Country, States Motion—see table of motions in delegate manual)

Chair: [Takes it from there (decides if the motion is in order or not, asks for a second to the motion, and conducts a vote, usually by voice acclamation)]

TENNESSEE YMCA MODEL UNITED NATIONS
GENERAL ASSEMBLY

the

Sponsor: Nicaragua

Delegates: Caroline Thomas

School: Harding Academy

A Resolution to Expand Renewable Energy Sources

- 1 Deeply concerned about the depletion of fossil fuels around the globe caused in part by
- 2 excessive burning, fuel emissions, and petroleum refining;
- 3
- 4 Alarmed by the harmful side effects of poor air quality from fossil fuels, including but
- 5 not limited to coughing, shortness of breath, headaches, increased risk of asthma and
- 6 pneumonia;
- 7
- 8 Noting that currently 58% of Nicaragua's energy is derived from renewable sources;
- 9
- 10 Recognizing that Nicaragua has been called by many experts "a paradise of renewable
- 11 energies" because of its extensive geothermal resources and exposure to wind, water,
- 12 and sun;
- 13
- 14 The nation of Nicaragua hereby:
- 15
- 16 Requests that the UN set aside \$20 million USD for developing Nicaragua's renewable
- 17 energy, establishing Nicaragua as a model for other countries to follow in enhancing
- 18 renewable energy infrastructure;
- 19
- 20 5 million USD of this money will go towards hydropower, specifically the extension of
- 21 dams and hydroelectric power plants;
- 22
- 23 5 million USD of this money will go towards geothermal energy, specifically the
- 24 development and expansion of geothermal energy plants;
- 25
- 26 5 million USD of this money will go towards solar energy, including installing solar
- 27 panels wherever available;
- 28
- 29 5 million USD of this money will go towards expanding existing wind power resources;

School: Spring Hill Middle School

An Resolution to Decrease Alcohol Consumption in Ukraine

- 1 Acknowledging that 0.90% of deaths in Ukraine are alcohol related.
- 2
- 3 Alarmed that Ukraine has zero rehabilitation centers.
- 4
- 5 Alarmed that the children of Ukraine as young as 12 years of age are exposed to
- 6 alcohol.
- 7
- 8 Concerned that 40% of children in Ukraine drink alcohol, mainly beer at least once per
- 9 month.
- 10 Emphasizing that up to 100,000 people (in Ukraine) die from alcohol and drugs each
- 11 year.
- 12
- 13 We the Delegation of Ukraine do hereby:
- 14
- 15 Recommend that Ukraine put an age restriction of 22 for the citizens of Ukraine
- 16
- 17 Propose we put 6 rehab centers to help with the addiction to alcohol
- 18
- 19 Noting that the rehab centers would cost on average per center 350,000 to 400,000
- 20 dollars in the first couple of years
- 21
- 22 The rehabilitation centers would be located at these cities 2 in Kyiv, 1 in Mariupol, 1 in
- 23 Kherson, 1 in Rivne, and 1 in Lutsk.

TENNESSEE YMCA MODEL UNITED NATIONS
GENERAL ASSEMBLY

the

Sponsor: Democratic Republic of the Congo
Delegates: Valerie Morrison, Brooke Squires
School: Webb School

A Resolution to End Sexual Abuse in the Democratic Republic of Congo

- 1 Desiring to eliminate or lessen sexual abuse and misconduct of females ages thirteen
- 2 to sixty in the Democratic Republic of Congo,
- 3
- 4 Acknowledging that many of the 100 and 30 armed groups, including security forces, in
- 5 the eastern part of the DRC have been sexually abusing women,
- 6
- 7 Deeply concerned that women and girls have been taken by these groups, held, and
- 8 used as sex slaves, victims are often wounded with weapons, such as machetes, before
- 9 being raped and abused,
- 10
- 11 Alarmed by the number of females ages two to eighty who have been objectives of
- 12 rape, as have some men and boys,
- 13
- 14 Taking note the worldbank.org states that in 2019 "35 percent of women worldwide
- 15 have experienced either physical and/or sexual intimate partner violence or non-partner
- 16 sexual violence," ,
- 17
- 18 Keeping in mind, South Africa itself has the highest rate of rape with 132.4 incidents
- 19 per 100,000 people in the year 2010;
- 20
- 21 Believing medical problems often arise with the victims after the rape, commonly
- 22 ending in death, those who have survived frequently require medical help,
- 23
- 24 The Democratic Republic of Congo hereby:
- 25
- 26 Calls upon the UN to provide aide through the UN Action against Sexual Violence. The
- 27 DRC believes that, with the help of the UN, this issue as well as can be resolved.

TENNESSEE YMCA MODEL UNITED NATIONS
GENERAL ASSEMBLY

the

Sponsor: Pakistan
Delegates: Shira Binshtin, Maya Everhart, Maya Gemignani, Kailynn Poynor
School: Grassland Middle School

A Resolution to Solve Prison Overcrowding and Terrible Prison Conditions

- 1 Deeply concerned that prisons in Pakistan are overcrowding, with the overcrowding rate
- 2 being 134%, with significantly higher percentages depending on the prison and about
- 3 33,000 prisoners over the maximum amount of people authorized;
- 4
- 5 Noting with concern that Pakistan has absolutely terrible conditions for their inmates
- 6 and do not meet the international standards along with almost 2,400 prisoners that
- 7 have suffered from chronic contagious diseases such as hepatitis, HIV, and
- 8 tuberculosis;
- 9
- 10 Recognizing that in November of 2019 government report found that 77,275 inmates
- 11 were being held in 114 prisons with a total capacity of 57,742 while the majority of
- 12 people detained in the prisons were still awaiting trial;
- 13
- 14 Further reclaiming that 134 women had children with them in prison, some as old as 9
- 15 and 10, despite the legal limit of 5 years with at least 195 children who were housed in
- 16 prisons as of 2020;
- 17
- 18 Acknowledging a critical lack of funding in the prison healthcare system has meant that
- 19 mothers whose children are with them in prison often lack essential health care, leaving
- 20 both the women and the children at risk of contracting infections;
- 21
- 22 Recalling that inmates were regularly caged and chained, often in places like cellars and
- 23 closets while naked, or being physically abused was common, along with mentally ill
- 24 inmates who were held in the general population with no treatments available to them;
- 25
- 26 The General Assembly Hereby:
- 27
- 28 Proclaims that to solve the ever growing problem we need to construct more prisons,
- 29 hire guards and start a prison system initiative to get inmates to work in exchange for
- 30 their release;
- 31
- 32 Encourages that the United Nations give \$650,000,000 million dollars towards building
- 33 these new prisons, hiring new employees, and starting a new initiative;
- 34
- 35 Expresses its hope the government to work towards trying to make it so that less
- 36 people are awaiting trial for years causing less of an issue with overcrowding;
- 37

38 Considers having women who gave birth in prison have more ability to get out or
39 having their child not grow up in prison, with the mothers consent, even be sent to
40 foster systems;
41
42 Recommends to address the problem at hand, which not only affects Pakistan, but a
43 larger portion of countries in this world.

A Resolution to Revive the World's Tourism Industry

1 To the General Assembly:
2
3 Fully aware that the decrease in tourism has impacted many countries' economies
4 including Switzerland's.
5
6 Alarmed that the International tourist arrivals in Switzerland declined 70% in the first
7 eight months of 2020.
8
9 Bearing in mind that this is Switzerland's worse crisis since World War II;
10
11 Taking into consideration the UN stated, "Tourism continues to suffer in the COVID-19
12 pandemic. Forecasts suggest a loss of over 4 trillion to the Global GDP by the end of
13 2021".
14
15 Recognizing that Switzerland hotels had a revenue loss of about 75% last year.
16
17 Acknowledging the UN Secretary-General said "Tourism continues to suffer enormously
18 due to the COVID-19 pandemic" and "It's time to rethink, transform, and safely restart
19 tourism".
20
21 Concerned that in 2020 Switzerland's largest airport experienced a year-on-year drop
22 of 73.5% flyers.
23
24 Acknowledging the Switzerland Federal Council stated, "The tourism industry is one of
25 Switzerland's most important economic sectors and employs around 4% of the working
26 population".
27
28 Alarmed with the upcoming Winter season when Switzerland generates the most profit;
29 the need for tourists is even more crucial.
30
31 Emphasizing that as the international population that is vaccinated increases, so will
32 tourism. Leading to a boost in the international economy.
33
34 Fully Aware that the UN Secretary-General stated, "It's imperative that we rebuild the
35 tourism sector".
36
37 Recognizing that many in the Swiss population are adamant about not getting
38 vaccinated, even though the country has a surplus of vaccines.
39

40 Confirming that only half of Switzerland's population is currently vaccinated right now,
41 which is not enough to ensure tourists safe travel.

42 The General Assembly hereby:

43 Requests all member nations require a Covid-19 vaccination mandate on people above
44 the age of 12 who are participating in international air travel.

45 Requests that member nations raise awareness about the significance of getting

A Resolution To Improve The State Of Health Care That Central African Republic Is Facing

1 To The General Assembly:

2
3 Acknowledging that health is a big problem in Central African Republic. They don't
4 have very good medical supplies and workers for hospitals.

5
6 Aware that without a lot of money, we can't have good hospitals and money to pay
7 workers

8
9 Keeping in mind that limited access to immunizations and sanitation means that
10 diseases like malaria and respiratory infections can easily spread around, with life-
11 threatening results.

12
13 Aware of the fact that without sustainable jobs they don't have money to buy food or
14 shelter.

15 The Delegates Of Central African Republic Call Upon The UN:

16
17 Emphasizing the fact that our citizens are very poorly educated, We would like teachers
18 from the UN peacekeepers to come and educate our citizens so they can be open to
19 better jobs for the future.

20
21 Accepting the fact that the UN peacekeepers can not stay forever we request 2
22 thousand US dollars for education expenses.

23
24 Recognizing that our citizens need supplies for being a doctor or nurse we ask for 2.6
25 tons of medical supplies.

26
27 Submission:

28
29 Central African Republic needs your help and we hope that by 2025 that we will have
30 enough people educated and by 2030 we will have our unemployment rate up to 25%.
31 We hope you understand.

A Resolution to Reduce Abuse of Children in Lithuania

- 1 Noting with concern that the 2020 Human Rights Report on Lithuania reported that,
- 2 even though an effort has been made, violence toward children remains commonplace,
- 3
- 4 Viewing with appreciation that the Council of Europe Commissioner of Human Services,
- 5 Nils Muiznieks, is planning to reduce the harm and abuse of children by, "implementing
- 6 the law banning all forms of violence against children through a coordinated strategy
- 7 and effective and independent monitoring,"
- 8
- 9 Deeply concerned that in an open survey in Lithuania, with a total of 1,143 children
- 10 with the ages ranging from 10–15-year-olds, over half admitted to having been hit by
- 11 their parents or other disciplinarians,
- 12
- 13 Regretting the death of a four-year-old boy, who was beaten to death by his parents,
- 14
- 15 Fully alarmed that over two-thirds of parents have admitted to physically hitting their
- 16 children multiple times to try to discipline a lesson into them,
- 17
- 18 Keeping in mind that the Declaration of Human Rights recognizes the equal and
- 19 unalienable right, as well as the inherent dignity, of every member of the human
- 20 family,
- 21
- 22 Alarmed by the sub-par protection in place,
- 23
- 24 Taking note that within the first 8 months of having children physically abused in
- 25 Lithuania, the child abuse hotline received over 421,000 calls, but were only able to
- 26 respond to 192,
- 27
- 28 The delegation of Lithuania does hereby:
- 29
- 30 Urge the Social, Humanitarian, and Cultural Committee to give \$16 million to the
- 31 Lithuanian child abuse hotline for them to get the correct resources needed to make it a

A Resolution to Address the Non-Renewable Energy Issue

- 1 Noting with concern that 84% of the world's energy comes from nonrenewable sources,
- 2
- 3 Keeping in mind that only 15% of the nations in the world have a steady renewable

- 8
- 9 THE GENERAL ASSEMBLY HEREBY:
- 10
- 11 Calling upon the United Nations to help have more clean energy and to mainly stop
- 12 using non-renewable sources and change to renewable energy;
- 13
- 14 Affirming that Argentina at this time is unable to stop using unclear energy;
- 15
- 16 Bearing in mind that we would install windmills on the mountains near the border of
- 17 Chile and Argentina, solar panels on top of houses, and dams across the Rio Negro

- 19
- 20 Noticing that clean energy will be channeled into renewable energy and cause new

- 22
- 23 Noting the cost of a standard solar panel is two thousand to six thousand dollars to buy
- 24 and install;
- 25
- 26 Acknowledging the fact that to power Argentina, you would need about sixty million
- 27 solar panels to power the country of Argentina;
- 28
- 29 Fully aware that it would cost us 3.1 billion USD to do this transaction, and if we got

A Resolution to Construct Hydroelectric Dams in Somalia

- 1 Disturbed by this flooding occurring as recently as May 2021, approximately 840,000
- 2 children under the age of five are affected from floods.
- 3
- 4 Aware that Somalia has been in over 10 years of drought and flooding. The floods are
- 5 deadly and need to be controlled by dams.
- 6
- 7 Reminded that flooding began in the country in late April, where heavy rainfall caused
- 8 severe flooding in Mogadishu causing nine people to die and buildings to collapse.
- 9
- 10 Recognizing that the flooding across Somalia is so severe, it prevents people from being
- 11 able to go to work each day.
- 12
- 13 We call upon the UN to provide a donation of 100 million dollars to construct five
- 14 hydroelectric dams on Shebelle and Jubba.
- 15
- 16 Expressing that these dams will also provide electricity to the people of Somalia and

- 18
- 19 Reaffirming that these dams will control the flow of water in the Dawa, Jubba, Shebelle,
- 20 and Ewaso Ng'iro Rivers, which will help control and prevent future flooding.
- 21

- 3
- 4 Recognizing how homelessness had made it hard for people in Ireland with not good-
- 5 paying jobs to afford a home,
- 6
- 7 Keeping in mind the UN's attempt to solve the housing crisis with the resolution known
- 8 as the Resolution On Homelessness set in the 9th of March 2020,
- 9
- 10 Deeply concerned that even with this resolution, 2% of the population is still homeless
- 11 and 1.6 billion are in bad homes,
- 12
- 13 Affirming that the homeless resolution in 2020 wasn't good enough to help the 2% of
- 14 homeless people in the world, we should make a better one,
- 15
- 16 Further aware of the 2% of the population without homes the 1.6 billion with a bad one
- 17 might have it as bad as the 2% population of homeless people,
- 18
- 19 Observing that these 1.6 billion people with bad homes could have infestations; weak

- 1 Alarmed by the amounts of refugees within Azerbaijan from Armenia, Syria, and other
- 2 neighboring countries and the percent of them that are homeless - there are currently
- 3 735,000 homeless people residing here;
- 4
- 5 Concerned about refugees being forced out of their homes and those homeless due to
- 6 previous and ongoing wars;
- 7
- 8 Noting further, that in May 2021, when the most recent war started between Armenia
- 9 and Azerbaijan, this was not the first time they have gone to war, with problematic
- 10 history dating back to 1988, and altercation may recur, bringing with it a new exchange
- 11 of citizens between countries - either due to fleeing for their safety or being captured
- 12 and held as prisoners of war;
- 13
- 14 Fully aware that prisoners of war are still being exchanged between Armenia and
- 15 Azerbaijan, and illegal border crossing is occurring;
- 16
- 17 Adding to the problem, 185,000 refugees are coming in from Armenia due to war with
- 18 their people;
- 19
- 20 Having examined to a greater extent that Azerbaijan and Armenia are in one of their
- 21 most problematic years yet, tensions strong, the possibility of war never fully receding;
- 22
- 23 Deeply concerned by Azerbaijan's countless refugee and servicemen deaths in the wars
- 24 of 1990s to 2020s, a total of 3,773 Armenian servicemen have died along with 2,783
- 25 Azerbaijani servicemen;
- 26
- 27 We the delegation of Azerbaijan do hereby:
- 28
- 29 Request that, although there has been a ban on entry to Azerbaijan, and it is already
- 30 touched on in international law as set by the International Court of Justice, the court
- 31 adds restrictions to the legislation concerning the passage of people crossing borders,
- 32 especially those with the intent of staying across the borders of the country that they
- 33 are citizens of.
- 34
- 35 Implore the United Nations to grant us 3,000,000 American dollars or 5,510,000 AZN
- 36 for the construction of 120 small houses (done by a group of volunteers), arranged into
- 37 two "Tiny House Villages" to be used as temporary or permanent housing solutions for
- 38 the homeless population of Azerbaijan, specifically in the areas that need this the most,
- 39 in the hopes of breaking the homeless cycle.

40 Adding on to this plan by explaining the future effect it will have; homeless people who
 41 will then have a sustainable lifestyle, can then make a better life for themselves,
 42 ultimately strengthening the economy through their consumerism. A better economy
 43 would benefit everyone within Azerbaijan, including the rest of the homeless
 44 population, the expanding economy hopefully providing more jobs for them.
 45
 46 Confident that this plan will work, as it has helped to reduce the homeless population in
 47 numerous locations, providing useful, sustainable, and affordable housing for those who
 48 are experiencing homelessness. Tiny house villages have been constructed in cities like
 49 Detroit, Nashville, and Eugene, Oregon, to help to eradicate homelessness.

 3
 4 Keeping in mind that many people in South Sudan are living of 1\$ per day, and 1/2 of
 5 them lack food.
 6
 7 Mindful of the fact that South Sudan is a new country, that is continually struggling with

A Resolution to the Israeli-Palestinian conflict

- 1 Observing that since 1948, there has been constant conflict between the countries of
- 2 Israel and Palestine,
- 3
- 4 Noting with satisfaction that after world war II, the allied forces established the country
- 5 of Israel so that the Jewish people who had been persecuted all over the world,
- 6 including the Holocaust, had somewhere to live together,
- 7
- 8 Fully aware that where Israel was established, is located in the same place as Palestine,
- 9 where many Palestinians were already living, though, not all of Palestine was lost to
- 10 the making of Israel,
- 11
- 12 Acknowledging that the two countries have been fighting each other for what they think
- 13 is their rightful land and that the battling continues today,
- 14
- 15 Mindful that both states consider many cities in Israel holy and sacred to their religion,
- 16
- 17 Conscious that with the fighting, there has been a humanitarian crisis, with a lack of
- 18 food, shelter, and security for both sides of the conflict, especially in Palestine's Gaza
- 19 Strip,
- 20
- 21 Keeping in mind that on May 21, 2021, a fight broke out between the two states for
- 22 eleven days, with more than two hundred and fifty Palestinians killed, and almost two
- 23 thousand more injured, with nearly thirteen Israeli deaths, tens of millions of dollars of
- 24 damage and seventy-two thousand Palestinians displaced
- 25
- 26 Aware that these types of wars are constantly happening, and is affecting the region
- 27 tremendously
- 28
- 29 We the delegation of Israel do hereby:
- 30
- 31 Call upon the United Nations to lead the negotiations between Israel and Palestine to
- 32 develop the once thought of, two-state solution, which is the idea that both Israel and
- 33 Palestine would be recognized as independent, self-governing counties with agreed to
- 34 borders,
- 35
- 36 Declares that the two countries will peacefully follow this resolution,
- 37
- 38 Further resolves that both countries will cease any and all negative actions against the
- 39 other,

40
41 Supports that the holy and sacred city of Jerusalem will be shared between the two
42 states so that both Israel and Palestine can have the special land that is very religiously
43 important to them,
44
45 Further proclaims that this resolution will be carried out immediately, and will be
46 enforced by the United Nations peacemakers,
47
48 Authorizes that when either country does not follow this resolution, economic sanctions
49 will be enforced upon these countries by the United Nations member states.

A Resolution to Slow the Spread of Diseases in Mozambique

- 1 Acknowledging the capital of Mozambique is Maputo which is south of Mozambique.
- 2 Mozambique has a Republic government, and the leaders name is Filipe Nyusi. The GDP
- 3 per capita of Mozambique is 503.57 USD. 26% of Mozambique is Roman Catholic, 18%
- 4 Muslim, and 15% Zionist Christian.
- 5
- 6 Affirming the population of Mozambique is 30.37 million people (about the population of
- 7 Texas). Our solution to this problem is donating money and materials to illness from
- 8 diseases. We want to start a fundraiser to donate to medical systems and hospitals.
- 9
- 10 Believing we need to donate food because Mozambique deals with drought along with
- 11 the illnesses in the very dry season with not enough food in hospitals and medical
- 12 systems for the workers and the patients.
- 13
- 14 Alarmed by the fact that there are only 70 hospitals in Mozambique. We would like to
- 15 raise money to build more hospitals and to hire more doctors and nurses.
- 16
- 17 Having examined that the UN has halved the amount of people in need of food from
- 18 1995 to 2015, it would help tremendously if Mozambique could have an increased
- 19 number of hospitals to help sickened and injured people.
- 20
- 21 Keeping in mind that there are only 82 schools in Mozambique, we would like to ask the
- 22 UN for \$100,000,000 to fund for new schools. Using that money, we could build over 20
- 23 schools.
- 24
- 25 We the Declaration of Mozambique do hereby:
- 26
- 27 Call upon the UN Conference on Disarmament to commence negotiation with
- 28 Mozambique in order to make hospitals.

Resolution to Correct Cuba ´s Water Pipeline Issues

- 1 Alarmed that Cuba as a nation is facing problems with their pipelines.
- 2
- 3 Take note that they are old, outdated, and more than 50 percent of the available water
- 4 is lost to a leaking drainage system.
- 5
- 6 Concerned that the pipes can cause Hepatitis A because they lack sanitation.
- 7
- 8 Acknowledging that the exposure to this type of contamination has been known to
- 9 weaken liver function.
- 10
- 11 In conditions of extreme drought, such as the one Cuba is currently facing, every city
- 12 block is permitted to request one government water truck.
- 13
- 14 However, the trucks are too slow to arrive for many Cubans, who pay illegal water
- 15 vendors to transport water, by horse and carriage , from houses that have running
- 16 water to houses that do not.
- 17
- 18 We the delegation of Cuba do hereby:
- 19
- 20 Call upon the United Nations to fix the water pipeline issues in Cuba by funding
- 21 pipelines to end the severe water pollution crisis.
- 22
- 23 Cuba asks the UN to donate forty three million dollars to purchase the following
- 24 271 miles of pipeline and installation of the pipeline.
- 25

A Resolution to Reverse Deforestation in Panama While Cleaning the Panama Canal

1 To the General Assembly:

2
3 Noting With Concern that the amount of trees in Panama has decreased by roughly
4 20,000 hectares per year,

5
6 Realizing that Panama's forest are home to 1,500 known animal species and 10,000
7 known plant species,

8
9 Aware that the indigenous peoples in Panama have the right to refuse projects and
10 investments which affect their natural resources, according to the 2007 UN Declaration
11 on the Rights of Indigenous Peoples,

12
13 Acknowledging that indigenous peoples in Panama refused the UN safeguarding their
14 forest in 2013 for fear of losing control of the forest,

15
16 Recognizing the efforts of the indigenous peoples of Panama by monitoring the forests
17 using drones,

18
19 Mindful of the FAO drone project carried out by the UN-REDD (United Nations
20 Programme Reducing Emissions From Deforestation and Forest Degradation) so as to
21 monitor Panama's forest,

22 The Delegates of Panama hereby:

23
24 Encourages the UN and the government of Panama to set-up a website where loggers
25 can get a license to cut the amount of trees they need to cut;

26
27 Requests the UN and the government of Panama to increase the price of a license as
28 the number of trees the loggers wanted to cut increases;

29
30 Asks the UN and the government of Panama to hire a supervisor to make sure the
31 loggers cut the amount of trees they paid to cut;

32
33 Urges the UN and the government of Panama to use the money received from the
34 loggers to grow more trees;

35
36 Recommends the UN and the government of Panama to grow mosses, climbing ferns,
37 lichens, and epiphytes, plants that can support a cloud forest. The tropical cloud forest

39 of the canal watershed ensures the flow of roughly 2 billion gallons of clean water
40 necessary to operate the canal locks;

41
42 Calls upon the UN to give our country 100,000 USD to boost our project which will not
43 only help Panama with deforestation, but also help the countries who use the Panama
44 Canal to import and export goods by boat.

A Resolution to Create Safe Zones in Syria

- 1 Alarmed by the fact that the civil war in Syria has led to more than 500,000 deaths, 13
- 2 million internally displaced Syrians, and 5.6 million refugees predominantly in Lebanon,
- 3 Jordan, and Turkey.
- 4

to Restrict the Spread and Severity of Malaria**

1 Noting with concern that our nation has not had the means to counter Malaria, but also
2 recognizing outside organizational efforts have provided us with the means to contain
3 small areas, such as mosquito nets and anti-mosquito spray.
4
5 Keeping in mind, The United Nations Office for the Coordination of Humanitarian Affairs
6 has stated that 5.7 million cases of parasitical or infectious Malaria had been reported in
7 just one year in 2019,
8
9 Considering that the figure is roughly half of the full population, which was 12.37
10 million as of 2020, this is a serious threat to our national health,
11
12 Taking note that no past UN resolutions related to combating parasitical or infectious
13 disease in Burundi have been passed,
14
15 Viewing with appreciation the efforts of organizations such as The United Nations Office
16 for Coordination of Humanitarian Affairs and other organizations to provide small aid to
17 Burundi,
18
19 Reaffirming that the United Nations Charter has several clauses relating to international
20 help and cooperation in the field of global health and human well-being
21 Article 13, Sub-Section 2 - promoting international co-operation in the economic,
22 social, cultural, educational, and health fields, and assisting in the realization of

28 of peoples, the United Nations shall promote: solutions of international
29 economic, social, health, and related problems; and international cultural and
30 educational cooperation,
31
32 The Republic of Burundi hereby:
33
34 1. Notes the fact that sufficient resources are needed for our government to properly

36
37 2. Requests the Social and Humanitarian Affairs Committee to provide us with large
38 quantities, preferably over 10 million doses, of the quinine anti-parasite medicinal drug

A Resolution to More Access to Water on the West of China

- 1 Alarmed by the overpopulation of our country, China, because we have 1.398 billion
- 2 people in a 3.7 million mile radius. The east side of China near Shanghai, Hong Kong,
- 3 and Macao are the most populated places with near to 900 people per kilometer,
- 4
- 5 Taking into consideration that the west side of China is less populated than the east
- 6 because the west is less habitable because of the amount of water.
- 7 (<https://geology.com/world/china-satellite-image.shtml>) If you look at the map you can
- 8 see that there are almost no rivers in the west of China. It is almost all taken up by
- 9 deserts and mountains. All of the rivers are in central China and the east has the Pacific
- 10 Ocean for a water supply.
- 11
- 12 Acknowledging that if there were a water supply in the west it would level out the
- 13 people in the east which would solve the problem of completely insane amounts of
- 14 people in one spot,
- 15
- 16 Having decided that if the United Nation helps us make a man-made water source that
- 17 it would level out the amount of people and would allow us to use more of our land for
- 18 living, jobs, and agriculture,
- 19
- 20 The General Assembly hereby:
- 21
- 22 Calls upon the United Nations to help make a man-made water source that will allow
- 23 our country, China, to level the population of the east part and make it equal to the
- 24 amount of people in each region;
- 25
- 26 Takes note that we are unable to rid overpopulation in a diplomatic way, we are able to
- 27 level out the population by making the west region more habitable and easier to build
- 28 on;
- 29

A Resolution to Law Enforcement Corruption in Jamaica

- 1 Noting with grave concern that in the country of Jamaica over 50 percent of law
- 2 enforcement officials are corrupt in some form, from petty and bureaucratic corruption
- 3 to criminal infiltration of the state, this continues to rise rapidly due to the very limited
- 4 choices available to law enforcement, Benjamin Franklin said it best "Join or die",
- 5
- 6 Bearing in mind that though the police are widely seen as corrupt, many Jamaicans also
- 7 believe the country needs law enforcement, violent crime pervasive in Jamaica, this is
- 8 fueled by many things, the country's strategic location for smuggling drugs into
- 9 neighboring countries like the United States, and Mexico,
- 10
- 11 Disturbed that in past investigations, over half of police killings and arrests have been
- 12 found to be unlawful, and essentially converting jamaican police into their personal
- 13 hitman, among other things,
- 14
- 15 Deeply Concerned that individual Jamaicans have unfortunately given up on their birth
- 16 rights, Rights that never should feel threatened,
- 17
- 18 Viewing with appreciation that the JCF, Jamaica Constabulary Force and the
- 19 government of Jamaica have taken some action, that is not enough, like Prime Minister
- 20 Andrew Holness publicly stating that the social and economic status of the victim does
- 21 not determine the outcome of justice, Those reassurances were necessary because
- 22 there are long-standing problems with policing and the local human rights groups, they
- 23 have found there's a culture of fear, with officers carrying out extrajudicial killings,
- 24 tampering with evidence and intimidating witnesses, all this not only affects the police
- 25 department but the whole justice system, essentially a chain reaction, Jamaica in the
- 26 mid-1960's shooting incidents were about every 7 in 100,000 annually, Now shootings
- 27 with intent to kill increased by 1,900 percent,
- 28
- 29 Violent crime has increased even in the face of improved socioeconomic conditions,
- 30 Rapid social change, which has produced a breakdown of traditional social roles and
- 31 institutional controls over behavior, coupled with an increase in the percentage of the
- 32 young adult population prone to crime, are believed to be the primary causes-
- 33
- 34 We the Delegation of Jamaica do hereby:
- 35
- 36 Call Upon the United Nations to end this affliction and improve the national security for
- 37 Jamaicans and the international community as well, Encourage the UNSC(The United
- 38 Nations Security Council) to insist on imposing a universal thorough investigation
- 39 starting with Jamaica, to find the people or organizations behind the corruption and

40 violations happening within law enforcement, also endorse a sanction for any persons
41 or organizations behind this, this sanction will include the indefinite suspension of the
42 law enforcement official doing such criminal actions, the arrest of the persons or
43 organizations and hold them from the maximum time permitted under their local
44 jurisdiction if needed even ICJ (International Court of Justice) , and the action of the
45 Blue Helmets in the given region if over 40 percent of the police are found guilty of any
46 crime that affects the security of those they swore to protect. We also seek that the
47 UNSC and HRC (Human Rights Council) to work with individual countries no matter
48 what amount of their officials come up corrupt to help put a stop to the fear inspired by
49 those who are suppose to make us feel the safest,
50

51 We Urge the United Nations as a whole, the UNSC, the HRC and the ICJ to take
52 responsibility of protecting the citizens of the world, we can not look at the people of
53 this earth as citizens of the country they reside because at the end the day they are
54 global citizens, and their safety can longer be overlooked but made a priority,
55

56 Trusts the United Nations and councils to see the urgency of this resolution and to
57 provide the assistance needed
58

59 This issue will only continue to grow, and the day will come when it is all out of our
60 control.

Our Resolution to Abolish Poverty In Italy

1 Noting with regret, the number of people in poverty in Italy has been rising in the
2 1980s,
3
4 Fully aware of the 1989 status report that showed the decline slowly but now has
5 become rapidly decreasing,
6
7 Expressing that there are currently 4.6 million people living under the poverty line in
8 Italy,
9
10 Emphasizing that due to the COVID- 19 pandemic, 97 million Italian citizens have been
11 forced into extreme poverty
12
13 Proclaims that 12.9 million of the child population of Italy is growing up in extreme
14 poverty,
15
16 Noting with great concern that poverty has become a global issue with 9.2% of the
17 world survives on less than \$1.90 a day,
18
19 If we are able to decrease the poverty rate it will help us to decrease the
20 unemployment rate,
21
22 The unemployment rate in Italy is 10.2%,
23
24 Due to the high unemployment rate, there has also been an increased crime rate of
25 0.57% as of 2018,
26
27 Declaring that as of October 6, 2021, 42.8 million people have been fully vaccinated,
28
29 Approving that as of October 6, 2021, the current population of Italy is 60.4 million,

32
33 We, the democratic republic of Italy, hereby:
34
35 Call upon the WFP, the FAO, the ILO, UNESCO, and WHO,
36
37 Further invites the request that the Economic and Financial, Social Humanitarian, and
38 Cultural Committees of the United Nations help with the problem of poverty,
39

40 Thus calling upon the WHO to provide 38.5 million Covid vaccines, which can help
 41 ensure that all Italians suffering from poverty can get vaccinated,
 42 Requests 10,000 volunteers to help with vaccine distribution,
 43 Proclaims that UNESCO can help by providing us with \$209.6 billion,
 44 Expresses its hope to give this money to families in extreme poverty and poverty,
 45 This designates \$8,000 for their living expenses per household,
 46 We also request UNESCO and ILO work together to fund Italy with \$1.2 billion,
 47 With this money, we plan to give each of the current 12,000 startup businesses
 48 \$100,000 to hire 5,130 Italian employees each,

A Resolution to Address Overpopulation in the Netherlands

- 1 Noting with grave concern the overpopulation of the Netherlands.
- 2
- 3 Recognizing that in 1986 the Netherlands agreed to take on 500 refugees per capita

A Resolution to Solve Poverty Globally

- 1 Noting with grave concern, the total number of people in poverty has reached 689
- 2 million and live on less than \$2.00 a day,
- 3
- 4 Considering this has become a worldwide problem that needs the attention and
- 5 guidance of the United Nations and the poverty percentage in New Zealand is about
- 6 15%,
- 7
- 8 Acknowledging that poverty is a global problem that almost every country faces and
- 9 New Zealand would be our trial and from there, we would make adjustments based on
- 10 our findings,
- 11
- 12 Recalling that the United Nations has tried many forms of addressing poverty and has,
- 13 by setting goals and making a plan based on those goals,
- 14
- 15 Recognizing that have also tried making education and work more accessible for those
- 16 most vulnerable, and giving resources to those in need,
- 17
- 18 Bearing in mind that "Oxfam" is a global development organization that is endorsing the
- 19 fight against poverty, which has helped millions who are living on scarce resources by
- 20 sending immediate care to those in need, make campaigns on the rights of humans in
- 21 poverty, and influence others to do the same,
- 22
- 23 Guided by this organization, we plan to establish these goals on a global scale,
- 24
- 25 Taking into consideration that the United Nations will have larger impact and influence
- 26 on the globe then Oxfam and will be able to spread their goals,
- 27
- 28 We the Delegation of New Zealand do hereby:
- 29
- 30 Call Upon the United Nations to approve our plan to eliminate poverty by giving us 15
- 31 million dollars per country in need,
- 32
- 33 Fully aware we will get this money from taxing countries that can afford the amount of
- 34 money needed,
- 35
- 36 This money will be given to countries with 10% or more of their population in poverty,
- 37
- 38 It also depends on the percentage of people living in poverty in that specific country,
- 39

40 Having examined what this money might be used for, we fully intend for it to go
41 towards education, work, housing, food, water, and supplies,
42
43 We expect and anticipate this bill will take action by January 1st, 2022,
44
45 We trust that the United Nations recognizes the urgency of our issue.

A Resolution to the Heat Control Issue in Populated Areas Of The
Philippines

1 To the General Assembly:

2
3 Concerned about high and rising temperatures in the Philippines as well as the
4 byproducts of air conditioning, cognizant that with an average annual temperature of
5 about 81.86 degrees Fahrenheit, rising temperatures can and will lead to risk of death.

6
7 Bearing in mind the fact that without cooling, heat exhaustion can disrupt the body's
8 functioning and lead to extreme illnesses such as organ failure and, eventually, death,
9 and that conventional air conditioning can release harmful greenhouse gases into the
10 atmosphere, which in turn will contribute to an even further increase in temperature;

11
12 Expecting that by the end of the century greenhouse gas emissions from air
13 conditioning alone will be responsible for as much as 0.5 degree celsius rise in global
14 temperatures, and addressing the problem of mass usage of air conditioning, thus
15 massively reducing energy consumption;

16
17 Addressing the issue of central air control units emitting fluorinated hydrocarbons,
18 which are widely used hazardous gas chemicals, making a heating issue an even more
19 pressing threat;

20
21 Predicting that the solution created for the current case of the delegation of the
22 Philippines could be utilized to lower temperatures in other densely populated areas
23 with heating issues as well;

24
25 We the Delegation of the Philippines do hereby:

26
27 Proposes a solution to the heating crisis of the densely populated areas of the
28 Philippines, as well as finds a cooling system that is more sustainable for the
29 environment than conventional air conditioning;

30
31 Finds that ultrawhite paint standardly known as CC-10 with high percentages of barium
32 sulfate can keep surfaces up to 13 degrees fahrenheit cooler than without it;

33
34 Proclaims that with the help of the United Nations, the Philippines can cover the
35 rooftops of densely populated areas of Filipino with said ultrawhite paint, reducing the
36 amount of harmful greenhouse gases released into the atmosphere, therefore helping
37 lower the temperature of the islands over all;

38

39 Urges the United Nations to focus some of their energy to develop a solution that could
 40 benefit not only the Philippines, but also the populated areas of all the earth;
 41
 42 Requests that we may be supplied with \$1,500,000 from the Contributions to
 43 International Organizations (CIO) account to cover the cost of the paint necessary to
 44 perform the task of painting the roofs on the densely populated Filipino island of Luzon,
 45 to result in the effect of resolving a problem with temperature and air conditioning in
 46 which the population of Luzon and surrounding areas are being negatively harmed by
 47 UV rays and consistent heat on the island;
 48
 49 Plans that after the rooftops of the island of Luzon have been covered in the ultrawhite
 50 paint, we will be able to move on to the rest of the Philippines and eventually the rest
 51 of the densely populated areas of Earth.

A Resolution to Uphold International Water Rights

1 Recalling the United Nations Convention on the Law of the Sea Resolution adopted on
 2 the 10th of December, 1982, which was signed by both the nations of India and Sri
 3 Lanka, and affirmed a nation's territorial waters as 12 nautical miles off of a nation's
 4 coast;
 5
 6 Angered by the complete disregard of these water rights by the nation of India who
 7 continues to overfish and deplete the fisheries of Sri Lanka in the Indian Ocean;
 8
 9 Noting that fishing is the predominant economic activity in northern Sri Lanka, and
 10 accounts for the livelihood of the majority of the northern Sri Lankans;
 11
 12 The nation of Sri Lanka hereby:
 13
 14 Urges the United Nations reaffirm the sanctity of water rights by re-dedicating itself to
 15 the aforementioned 1982 treaty;
 16
 17 Asks the United Nations to publicly reprimand India for their actions in our waters;

- 3
- 4 Bearing in Mind that Norway has a population of over six million people and does not
- 5 have a super large area of land,
- 6
- 7 Recalling that it could be hard to pay and live in Norway because of the money they

- 9
- 10 Disturbed that Norway could open more jobs for people to have, and they could have

**A Resolution to Provide Relief to the Kingdom of Bahrain in dealing with
the Rise of Sea Level**

- 1 Noting the fact that climate change is rapidly causing sea levels to rise, the Kingdom of
- 2 Bahrain is currently at high risk of being severely damaged by the rising ocean and is in
- 3 danger of losing 27 to 56 percent of its land by 2100,
- 4
- 5 Emphasizing that this loss of land would wipe out the economy and the water supply of
- 6 the nation. If the water level rises further, it could jeopardize the cleanliness of the
- 7 aquifers that the nation relies on for much of its fresh water,
- 8
- 9 Concerned by the fact that most of Bahrain's population is concentrated in an area that
- 10 does not exceed 5 meters in elevation, any significant change in sea level, such as the
- 11 one projected by the U.N.'s climate panel, the IPCC, would force the majority of
- 12 Bahrain's 1.7 million people to relocate, throwing the entire region into turmoil,
- 13
- 14 Thanking the UNCCC for its action to warn about and discuss the dangers of climate
- 15 change and sea level rise, the Kingdom of Bahrain is completely in support of the Paris
- 16 Climate Accords and other U.N. recommendations, and will assist the U.N. on this front,
- 17
- 18 Conscious that action is currently being taken to combat climate change and control sea
- 19 level, more targeted action is needed and should not be overlooked, as the world
- 20 economy as well as the standard of living for many people would be severely hurt.
- 21
- 22 The delegation of Bahrain hereby,
- 23
- 24 Urges the United Nations to appropriate funds for the preservation of land and the work
- 25 against sea level rise in at risk countries,
- 26
- 27 Requests that the U.N. send aid to refugees displaced by sea level rise in the years to

- 29
- 30 Acknowledges the work and dedication being poured into resolving the climate crisis by
- 31 the U.N. and member states and recommends that all states work on this enormous
- 32 issue facing the world today.

A Resolution to Improve Bahrain's Poverty Level

1 Noting with much anxiety that Bahrain is depending on natural finite resources to live,
2 and their natural resources will run out eventually, between 10 and 20 years, causing
3 poverty throughout all of Bahrain, a plan to keep Bahrain out of poverty needs to be
4 created.

5
6 Acknowledge that much of Bahrain is not currently under the poverty line, but when
7 finite resources run out, we anticipate that they will because their country is fully
8 dependent on that one industry. Bahrain will not need monetary help in the future if we
9 a create a sound plan to save Bahrain's future economy in society.

10
11 Bearing in mind that diversification is the key. We need to decrease the risk of poverty
12 in the future, by increasing diversification in other sectors. Bahrain is relying on one
13 industry right now but will be relying on many industries in the future if we can help the
14 healthcare and medical industries by expanding their healthcare system to world-wide
15 research and development. Another area we could help upgrade their system is the
16 technological sphere industry.

17
18 Noting further that they could increase their education level so overtime-they could
19 expand to encourage more primaries and PHD programs at local colleges, which will
20 help with the making of industries and other things to help with Bahrain's future
21 poverty level. The people of Bahrain are relying on one industry right now that
22 someone else is giving them. They are not doing any of the work, so they will need to
23 figure out how to make themselves successfully hold themselves up in the economy.

24
25 Taking note of that the key to this plan is that all of this takes time. If we start now
26 when Bahrain is not in dire straight and is not in poverty, we will have time to develop
27 the industries and increase higher education levels for students in need.

28
29 We the Delegation of Bahrain do hereby:

30
31 Calls Upon the United Nations to plan the quality of life of Bahrain, in the future and to
32 bring in other industries to help Bahrain's future. Poverty is not too high in Bahrain, but
33 the government does not give a lot of life requirements to survive.

34
35 Seeking the United Nations to donate two million dollars for needs in Bahrain such as
36 poverty, manufacturing companies such as in construction, and education to build
37 industries all around the country and to make a future for society. We would like The
38 UN to build and specialize in the manufacturer, healthcare, and education industries.

40 Notes this project would take a while to complete, but it would be worth it at the
41 finished product.

1 Concerned that millions of people are starving and children are malnourished in

3
4 Disturbed that this food shortage has been an issue for half a century.
5
6 Emphasizing that 19.7% of Ethiopia's population is severely affected by the lack of food
7 in the country.
8
9 Keeping in mind that there is a solution to this lethal problem.
10
11 We call upon the United Nations to provide a donation of 50 million dollars. These funds
12 will be used to cultivate large amounts of farmland and provide irrigation systems for
13 said land.
14
15 Recognizing that with these funds, roughly three thousand acres of land will be

17 crops, such as coffee.
18
19 Determined to save this country, which has one of the highest infant mortality rates, as
20 well as one of the lowest life expectancies.
21
22 Fully believing this will reduce the number of people starving in Ethiopia by a significant
23 amount.
24

3
4 Bearing in mind that they have made a law to stop this but there hasn't been enough
5 action going towards this law. Government in Moldova has tried to put forth free
6 education, but nothing has been able to stop this child labor.
7
8 Disturbed that thirty percent of Moldovan Kids are being forced into Child labor and

10
11 Deeply concerned that children are having their childhood taken away from them,
12 because of this. They are being taken advantage of since they don't know any better.
13 These kids are being taken away from their education, with no way of having future
14 because of the lack of education coming from child labor.

19
20 Hoping that there is enough to pay government officials to make sure these laws to

A Resolution To Address Water Scarcity, Sandstorms, Health, and Hunger in the Middle East

1 Noticing the issues of water scarcity; sandstorms; health; and hunger in the Middle
2 East,
3
4 Aware that nations in the Middle East are having issues regarding water sources; such
5 as scarcity of groundwater; and renewable groundwater,
6
7 Alarmed by the fact that the city of Dubai relies on 98.8% of its water to be provided
8 from desalination plants,
9
10 Concerned that importing water is precariously endangering the middle east,
11
12 Keeping in mind that UNICEF says the Arab region will be at a 60% hunger rate by
13 2030 unless the food systems are revised to some degree,
14
15 Reminding that imported water costs around 987 million to 2 billion dollars per import;
16 both for the donors and the ones on the receiving end,
17
18 Noting the lack of water is causing up to 3 sandstorms to blow unrestrictedly every
19 month,
20
21 Concerned the soil in the Middle East is loosely packed, and loose soil is what
22 sandstorms run off of,
23
24 Emphasizing that the lack of vegetation has caused hunger problems,
25
26 Acknowledging the 31.01% quota of expired civilians due to cardiovascular-related
27 problems in the area as to which we address,
28
29 The General Assembly Hereby:
30
31 Calls upon the committee to provide funding to Adventist Development and Relief
32 Agency International to plant hundreds of thousands of water-efficient plants such as
33 aloe; cactus; brittlebush; among others; such as ones used in cardiovascular medicine;
34
35 Asks for agricultural entities to be planted; as they could hold the soil together
36 throughout the UAE and the Middle East; as it would prevent sandstorms;
37

38 Urges for the plan to be put into effect; as more agricultural entities in the middle
39 eastern areas will produce a surplus amount of water; use a smaller amount of water in
40 the process, and provide an added quanta of food; as some water-efficient plants are
41 safe to eat;
42
43 Affirms stopping hunger; making medicine, and helping with water scarcity; water-
44 efficient plants would further decrease the number of sandstorms wreaking havoc
45 throughout the Middle East;
46
47 Expresses hope to be put in full effect within 10 months of United Nations approval;
48
49 Notes that the proposed solution is also within prospect to leave more money for the
50 nations to spend on other issues that can benefit the affected countries more profitably;

A Resolution to Provide a Safe Passage for Refugees out of Yemen

1 Noting with dire concern, the 21 million Yemeni citizens including 11 million children are in
2 need of fast humanitarian assistance before the country falls into devastation. Our aid
3 facilities deeply ravaged by the ongoing civil war and COVID-19 pandemic lack basic health
4 care tools and personnel;

5 Bearing in mind, along with all our citizens that are unable to leave the country safely to
6 seek the healthcare they are unable to get in Yemen, we are currently protecting over
7 130,000 Somali and Ethiopian refugees;

8 In addition, our aid facilities and humanitarian workers are in desperate need of basic health
9 care tools and medicines. Half of our country's aid facilities are non-functional and are not
10 able to provide health care to the 130,000 refugees and over 20 million citizens that need
11 help;

12 Emphasizing, the United Kingdom has provided enough supplies to feed 240,000 citizens and
13 enough water for 1.6 million citizens in Yemen. Considering the fact that there are over 16
14 million citizens that are not able to have a consistent supply of food and water, this number
15 needs to be greatly increased so that we are able to get refugees out of Yemen;

16 Bearing in mind that the UN Declaration of Human Rights has said that everyone is entitled
17 to food, water, sanitation, clothing and medical care. These rights are not able to be carried
18 in the current environment of our highly devastated country;

19 Deeply concerned that the UN Secretary-General has said millions of Yemeni children,
20 women and men desperately need aid to live. Cutting aid is a death sentence, we need help
21 and even though there has been help there has not been enough. We need the whole UN

A Resolution to Solve Worldwide Refugee Crisis

To the General Assembly, we come before you to ask for your aid on the current American Border Crisis revolving around the gulf refugee immigration issues, Concerned with nearly one million refugees trying to cross the American border, Acknowledging there are over ten thousand refugees under the Del Rio International Bridge in Del Rio Texas alone, Conscious of the impacts of UN agencies regarding immigration around the world where in most cases UN peacekeepers protect refugee camps, if there is a food and water shortage the UN will provide it along with other necessities however because there are so many refugees they simply cannot provide essentials for them, Referring to a core principle from one of the United Nations agencies, the UNHCR, one of these principles is that "a refugee should not be returned to a country where they face serious threats to their life or freedom.", Draws attention to how people at the border are currently being told to go back to the land they hail from because most of these people do not have passports, or immigration papers and permits, therefore even with the best intentions, they are breaking the law, Emphasizes how going back to where they came from means almost certain death for these people, because most of the places they are coming from have crumbling political systems, and most of these countries are in a state that is deteriorating rapidly, these places are on the verge of collapse, We the Delegation of The United States of America do hereby: Call upon the United Nations to supply the United States with USD 750,000,000 giving them the money from the UN to build permanent housing facilities for refugees and immigrants, Taking note that this may be a steep price tag, this money will go towards building large facilities that will include places for housing, schools, hospitals, and facilities that are needed for everyday life, Acknowledging at their core, these buildings are a way for immigrants and refugees to adjust to everyday life the American way, They will serve as holding grounds for these

people while they are still getting things like passports and immigration papers sorted out, Hoping to place these facilities near every immigration hot-spot, and hopefully, with your help, we can minimize these issues for the next generation, This resolution needs to be passed because it will solve not only American immigration issues, but the concept can help solve these issues globally, We also plan to authorize a nationwide draft board that serves like those used in World War II and The Vietnam War, Everyone between the ages of 18-26 would be eligible to be drafted into being part of the UN's United States peacekeeping division, These Peacekeepers would not only be used at the border but they would also be used to do the UN's "dirty work", Expressing our hopes that the Social Humanitarian and Cultural Committee will enforce this resolution starting with an optimistic date of 12/25/21, We will reevaluate the situation on 12/31/31, We hope that this policy will not only be used in the United States but other countries around the world.

A Resolution to Solve Venezuela's Health Crisis

- 1 Alarmed by the fact that many people in Venezuela are dying because of a health crisis.
- 2
- 3 Concerned that the hospitals have more people than beds, which terribly affects the
- 4 people who need the help since they won't be able to get the help due to the
- 5 overcrowded hospital beds.
- 6
- 7 Keeping in mind that the people in Venezuela need more doctors and electricity.
- 8
- 9 More concerned about this issue because of the ongoing virus, COVID-19.
- 10
- 11 Acknowledging the fact that when the population grows more, people are going to need
- 12 more hospitalization.
- 13
- 14 Disturbed that the hospitals are operating at half capacity or closed because they don't
- 15 have enough staff and materials.
- 16
- 17 The Delegation of Venezuela do hereby:
- 18
- 19 Call upon the United Nations to end this health crisis of Venezuela
- 20
- 21 Request that the UN donates 10 million dollars to purchase the following:
- 22 transportation, housing (both for US medical workers), medical supplies, solar panels,
- 23 and installation.
- 24
- 25 Note that it will need around 100,000 USD worth of solar panels to supply electricity
- 26 for the 7 hospitals and to the doctors, nurses, and medical staff, and it will also need
- 27 transportation and housing for at least 100 (switch 50 every two months) US medical

A Resolution to Reduce CO2 in the Atmosphere

- 1 Acknowledging the fact that global temperatures are at an all-time high and CO2
- 2 accounts for an estimated $\frac{3}{4}$ of the total heat trapped,
- 3
- 4 Aware of the fact CO2 not only traps heat but also has a variety of health side effects
- 5 like headaches, drowsiness, difficulty breathing, tiredness, increased heart rate, and
- 6 elevated blood pressure,
- 7
- 8 Recognizing that the UN has decided to adopt a 10-year Climate Action Plan and make

- 11
- 12 Noting with concern that if nations can not control the rising greenhouse gas emissions,
- 13 Earth will no longer be safe to live on,
- 14
- 15 The General Assembly Hereby:
- 16
- 17 Recommends a volcanic rock called Basalt that is known for its ability to remove CO2
- 18 directly from the atmosphere and increase plants nutrients when added to soil, give an
- 19 alternative fertilizer to other fertilizers with a high level of CO2, makes crops resistant
- 20 to most insects;
- 21
- 22 Takes note of the fact that Basalt only costs around 120\$ per ton and is very common
- 23 on Earth, it also surprisingly makes up 26% of the Moon;
- 24
- 25 Further recommends that Basalt be crushed and then crop dusted with existing
- 26 machines over farms in the UK since the UK is 70% farmland, which will increase the
- 27 amount of CO2 absorbed and help many farmers;
- 28
- 29 Requests for the UN to urge countries to use this method that is already being tested
- 30 and donate a total of 3 million dollars to countries that are not in the financial position
- 31 to spend this much money;

- 5
- 6 Acknowledging that It has also claimed responsibility for the multiple attacks for
- 7 example in 2015 attack on a Russian airplane that killed all 224 people on board,
- 8 December 2016 attack at a Coptic Chapel in Cairo that killed at least 25 people, April
- 9 2017 attack on Coptic Churches that killed at least 44 people and November 2017
- 10 attack on a Mosque that killed more than 300 people..
- 11
- 12 Acknowledging that the Egyptian President Abdel Fatah al-Sisi ordered the Egyptian
- 13 military to defeat the militant group Wilayat Sinai. Sisi has since pushed through new
- 14 laws to fight extremism. Because of this, local residents have suffered greatly.
- 15

- 3 and that rising rapidly. So, we plan to build small homes that are for those who are on
- 4 the streets and in need.
- 5
- 6 Calls upon the help of volunteers to help build homes for those in need. We would build
- 7 one thousand homes for a start, but we would not stop there. This is only a 10-year
- 8 plan. This includes beds, pillows, food ETC.
- 9
- 10 Bearing in mind that there are many that will not receive a home we will try are best to
- 11 raise more money for the future. We will try to fit 2 people per house. We will give
- 12 them a bunk bed, a set of pillows, and a mattress ETC.
- 13
- 14 Keeping in mind that apartments and homeless shelter are a good option. We have
- 15 done math and have concluded that small homes will be more effective and save us
- 16 money. We will put as many bunk beds as needed to fit a family with multiple people.
- 17
- 18 The delegation of Bulgaria hereby:
- 19
- 20 Resolves the fact that homelessness increases crime in an area that has a larger
- 21 population of homeless citizens. Bulgaria has a crime rate of 1.8 per 100,000 people.
- 22 About 60 percent of the crime is caused by homeless people. Around 155 people were
- 23 murdered last year in Bulgaria.
- 24
- 25 Takes note of the point that just under 7,000,000 people live in Bulgaria. One in every
- 26 fourteen people are homeless.
- 27
- 28 Reaffirms that we plan to build 1,000 small homes to take 2,000 people off the streets.
- 29 We are asking for \$11,076,034.70 from UN. We will build in Sophia the capital of
- 30 Bulgaria. Sophia has the highest number of homeless sites because of the amount of

A Resolution to Provide Sanitary Water to Cambodia

1 Fully aware that more than 3.4 million people lack access to safe water and 5 million lack
2 access to clean sanitation in Cambodia. This issue has not been hardly settled at all. At
3 this rate Cambodia will have barely any changes for decades.

4
5 Keeping in mind that poverty and lack of transportation is a massive factor in this
6 situation, most Cambodian's walk to find water every day. If there were wells at schools,
7 they could send their children for water each morning or walk themselves to a nearby school.
8
9 Keeping in mind that only about three percent of the earth's water is freshwater, and only
10 about one percent of the freshwater is accessible. We realize that Cambodia is in a tough
11 situation with only nine rivers and one lake. These water ways are located in the more
12 wealthy part of Cambodia.

13
14 Bearing in mind that 10,000 people die each year from unsanitary water and some are
15 severely ill because of contaminated water problems.

16
17 Aware of the fact that Cambodia is one of the poorest and economically depressed
18 countries in the world. They can't provide everything they need by themselves.

19
20 Notes that an average salary of the Cambodian citizens is about 7,000 dollars each year.
21 We are deeply concerned that over fifty percent of the population in Somalia, Ethiopia,

23

A Resolution to Minimize the Impact of Desertification in Mali

Being alarmed that 98 percent of Mali is being threatened by desertification, which impacts its nature and its civilians;

Unfortunately, the reason for desertification is caused by extreme weather that has fully eroded the soil, taking 73 percent of the trees in Mali;

Emphasizing that the United Nations has already provided a solution to deforestation in Mali in 2007, which runs from 2010-2020;

Keeping in mind the UN has took steps to raise efforts to improve conditions for multiple countries suffering from desertification stated in Resolution 44/172;

Noting further that the Declaration of Human Rights acknowledge that everyone has the right to a standard living adequate for the health of the people due to their surroundings stated in Article 25;

Having considered that Union of Concerned Scientists indicated some countries in Central America known as Mexico and El Salvador have tried to resolve deforestation;

Deeply Concerned that the UN Secretary-General Antonio Guterres' message stated that Land desertification harms bio-diversity and enables infectious diseases such as Covid-19. which we as a globe are struggling to overcome;

Desertification has been a problem in Africa for many years and is daily impacting the citizens of Mali;

We the Delegation of Mali do hereby:

Emphasize how desertification is threatening over 97% of Mali, we strongly urge that the UN takes action and executes our proposal. Our proposal insists that the drain water of showers no longer goes to waste, but instead goes into canals and through an aquifer. To first purify the infected water, then redirect and distribute it to needed lands. Allowing it to surface and serve as an artificial irrigation system able to inject water directly into the surface of the dehydrated lands of Mali. This law would state that the wasted shower water be put to usury to not only better the decertified lands of Mali, but also in other countries;

Considering that if this resolution gains approval. The main causes of Desertification will decrease when the aquifer is in action it will serve as an irrigation system saving

40 the soil from erosion, salinization, and various forms of degradation. This efficient water
 41 management can recover tree loss and crisis of dehydration in Mali 88 percent;
 42
 43 Requesting the UN that \$450 per acre-foot serving only half of the country due to
 44 other efforts of countries trying deal with this issue as a whole. The continent of Africa
 45 is crying out because of the same crisis. That this resolution not only helps Mali, but if
 46 successful other countries in the future.

Improvement of Human Rights Laws in Ecuador

1 Considering that exploitation of children is one of the most prominent issues that the
 2 country faces because it deprives children of their childhood, interferes with their ability
 3 to attend regular school, and is mentally, physically, socially, and morally harmful.
 4
 5 Recognizing that if the UN aided countries who experience problems surrounding child
 6 labor with the funding for education and laws around child labor, their overall economic
 7 prosperity and political stability would increase.
 8
 9 Noting that, because there are few laws around child labor, children don't usually leave
 10 the house until they are a legal adult. About 8.6 (359,597) percent of children, ages 5-
 11 17 in Ecuador work instead of regularly attending school. This usually results in poor
 12 education, and even sometimes none.
 13
 14 Fully alarmed that this pattern of child labor crosses many generations which leads to
 15 leads to a lack of development of good parenting skills. It undermines the social and
 16 moral development of children
 17
 18 The nation of Ecuador does hereby:
 19
 20 Recommend that UN standardize laws for children (ages 5-17) governing compulsory
 21 school attendance and child labor restrictions.

A Resolution to Hire and Arm Additional Troops to Protect Iraq

- 1 Alarmed by the fact that Iraq is surrounded by dangerous countries.
- 2
- 3 Concerned that the children will be growing up in a potentially unsafe and unlawful
- 4 environment.
- 5 Aware that this could easily devolve into an international crisis affecting countries in the
- 6 region and around the world.
- 7
- 8 We call upon the UN, to provide a loan of 75 million dollars.
- 9
- 10 Resolving to hire five thousand troops, provide training , housing, supplies, and
- 11 salaries.
- 12
- 13 Determined to repay ten percent of the loan back to the UN for ten years to pay for the
- 14 costs associated with this resolution.
- 15
- 16 Reminding that we will use the money from our oil businesses for paying.
- 17
- 18 Urging the UN to consider that if Iraq's government ever collapses, the world's oil
- 19 supply will reduce and increase the oil and gas market world-wide.
- 20
- 21 Aware that if we continue to remain a stable country, oil-trading will support our
- 22 economy and enable us to grow as trading partners with other countries in the region
- 23 and around the world.
- 24
- 25 Emphasizing that this resolution, along with our armed forces, will help us remain a
- 26 more stable country.
- 27

A Resolution to Improve Quality of Life in Sierra Leone

- 1 Alarmed by the fact that Sierra Leone is struggling against major diseases. One of the
- 2 most destructive is malaria. Around 38% of people go to the hospital because of
- 3 malaria.
- 4
- 5 Concerned by the fact malaria causes around 7,211 deaths in Sierra Leone. Malaria first
- 6 appeared in 1899 by Africans travelers, and ever since then the people of Sierra Leone
- 7 have been struggling.
- 8
- 9 Noting with concern, Sierra Leone has 5 diseases ranked number one worldwide. They
- 10 also have 5 diseases ranked second worldwide. Also 2 diseases rank third worldwide.
- 11 Recognizing that 63% of people in Sierra Leone do not have the stability of food
- 12 sources, and 31% of children under five suffer from chronic malnutrition.
- 13
- 14 Alarmed that 81% of Sierra Leone's population does not have access to proper hygiene
- 15 products such as soap.
- 16
- 17 Further alarmed that 81% of Sierra Leone is facing a water crisis, as they do not have
- 18 access to clean sources.
- 19
- 20 Noting with concern that children in Sierra Leone face obstacles that hinder their well
- 21 being. They face early marriage, adolescent pregnancy, child labor, female genital
- 22 mutilation (FGM), poverty, negative health conditions, and tremendous educational
- 23 challenges.
- 24
- 25 Recognizing that female genital mutilation (FGM) and male circumcision not only violate
- 26 the opportunity to govern ones own body, but also lead to death from the lack of
- 27 proper medical hygiene and equipment.
- 28
- 29 We the delegation of Sierra Leone do herby:
- 30
- 31
- 32 Call upon the United Nations to help improve the quality of life for those in Sierra Leone
- 33 by coming together as a community educating, and contracting from within the
- 34 community so that locals can not only learn proper hygiene, and have access to proper
- 35 medicine such as mobile medical clinics, but also create job and educational
- 36 opportunities such as digging wells so the community has access to clean water
- 37 sources.
- 38

39 Urges the United Nations to contribute \$90 million to supply proper medical insertions,
40 as well as help to position the following changes so the Sierra Leone community may
41 thrive.

42 Recognizing that in doing the following it would do a few different things for the people
43 of Sierra Leone, such as creating self sufficiency for economic purposes, as well as a
44 safer environment so that diseases are no longer thriving, better education so that
45 poverty, malnutrition, child abuse, and lack of hygiene are no longer an issue.

A Resolution to Establish Substantial Migration Infrastructure in the
Mediterranean

1 To the General Assembly:

2
3 Reminding all nations that there is an ongoing migration crisis in the Mediterranean
4 region. Migrants from Libya and Turkey have been straining immigration centers
5 throughout Europe, due to public opinion shifts in attitude towards immigration.

6
7 Recognizing that such a change in policies has put significant strain on European
8 resources because of approximately 311,00 arrivals through the Mediterranean per
9 year.

10
11 Acknowledging that most European countries do not have sufficient immigration
12 infrastructure to safely and humanely contain said migrants.

13
14 Noting that the UN Report "Europe and the Refugee Crisis: A Challenge to Our
15 Civilization" stated: "Europe has sought to contain migrant arrivals through the
16 questionable practice of outsourcing boundaries. As a consequence, Europe has
17 discovered that it lacks those instruments, such as humanitarian channels, which would
18 have made it possible to manage the emergency in a way that would have been more
19 in line with the principle of inalienable human dignity."

20
21 Recalling that according to Doctors Without Borders, a lack of shelter, being forced to
22 live in unhygienic conditions or adverse weather, treacherous border crossings, hostile
23 authorities. In addition, many migrants have reported deaths by starvation, as well as
24 violence at the hands of agents of the state, smugglers, and fellow migrants.

25
26 Noting that under these circumstances, migrants are prone to become diseased,
27 injured, and develop mental ailments like PTSD, anxiety, panic disorder, and
28 agoraphobia.

29
30 Concerned that over half of migrant deaths can be attributed to drowning and general
31 inadequate transportation followed by inhospitable conditions.

32
33 Acknowledging that women are at particular risk of the development of such ailments

34
35 Acknowledging that an average of 87,000 migrants have traveled to France each year
36 for the past three years.

37
38 Making it known that about 9.7% of the population in France is immigrants/migrants.

39 The General Assembly hereby:
40
41
42 Call upon the member nations and all relevant bodies to establish a treaty declaring
43 that all proceeds collected would be put towards the development of a humane and
44 organized migration pipeline in the Mediterranean. that would obligate all participating
45 countries to make a monetary commitment. In order to
46
47 Acknowledges that the purpose of these plans is to improve survival rates for migrants,

A Resolution to Help the Flood Damage in Thailand

- 1 Bearing in Mind of the flood in Thailand on September 1, 2021, has destroyed many
- 2 homes, schools, and buildings, including Kalasin, Mae Hong Son, Pattani, Prachin Buri,
- 3 Trat, and Yasothorn;
- 4
- 5 Noting further that 323,295 people were affected, and 56,459 households were damaged

- 7
- 8 Further recalling the recent monsoon on September 28, 2021, that killed six people, and
- 9 damaged 70,000 homes, and 58,977 people were affected, with Thailand's natural disaster
- 10 history, the Thai people's homes are constantly being destroyed, so restoration is
- 11 demanding things to upkeep;
- 12
- 13 Recognizing that some examples are the tsunami, that was caused by the 9.1 magnitude
- 14 earthquake in 2011 that brought disaster to the Thai people, taking away loved ones,
- 15 homes, and businesses, and the common floods, drought, tropical storms, and forest fires;
- 16
- 17 Noting that provinces along the Chao Phraya River are prepared for new flooding as water
- 18 levels increase in the Chao Phraya dam by 30 centimeters to a meter in the next few days,
- 19 and 13-30 provinces have been warned of major flooding;

- 25
- 26 Requests 35 million dollars going to the Thai people and their needs and necessities, (food,
- 27 clean water, places to live, etc).
- 28

**A Resolution to Condemn China's Dam on the Mekong River and to
Support the Economy of Laos**

- 1 Concerned that China has a dam located on the Mekong River, which is disturbing the
- 2 ecosystem.
- 3
- 4 Disturbed that this dam is making Laos lose its main protein source, including seafood
- 5 and rice.
- 6
- 7 Alarmed by the fact that this is affecting trade in the country.
- 8
- 9 Anxious that this dam is preventing irrigation around the country, affecting plants,
- 10 including rice which is their main food source.
- 11
- 12 We call upon the UN to pass a resolution condemning China's use of the dam, as well as
- 13 donate 7.5 million dollars to Laos.
- 14
- 15 Emphasizing that these funds will go toward solving economic problems due to loss of
- 16 trading opportunities and issues with hunger throughout the country. The funds will be
- 17 used to purchase and distribute food aid to the people most in need.
- 18
- 19 Encouraged that once the dam is removed, Laos' economy, environment, and hunger
- 20 issues will begin to improve and help establish a more stable country in the region.
- 21
- 22 As a result, we would like the UN to consider these ideas and help the devastating
- 23 country of Laos that is suffering from all these problems.
- 24

A Resolution to Lower Poverty in El Salvador

- 1 Fully aware that poverty is a big problem in El Salvador. About 40% of the population falls
- 2 below the poverty line. This issue is mostly caused by climate change. Farmers' crops die
- 3 because it is too hot, and the land is super dry which results in many people not being able
- 4 to make money.
- 5
- 6 Alarmed that 4 out of 10 inhabitants of El Salvador live in poverty. Half of the countries
- 7 children and teenagers live on less than 1.25 dollars per day. El Salvador lacks access to
- 8 water and sanitation services. Therefore, we are asking for money for irrigation systems
- 9 and wells to fix this issue.
- 10
- 11 Emphasizing that El Salvador is one of the poorest countries in the Western hemisphere.
- 12 According to world finance 70 percent of businesses suffer from gang related crime.
- 13
- 14 Deeply concerned that El Salvador is the fifth poorest county with a per capita GDP of 4,131
- 15 dollars; Compared to the USA our GDP is 59,000 dollars.
- 16
- 17 The delegation of El Salvador hereby:
- 18
- 19 Further requests that we have 5,000,000 dollars because our solution to poverty is to build
- 20 wells and install irrigation systems so that farmers' crops will not die.
- 21
- 22 Has resolved climate change hurting farmers' crops, with the wells and irrigation systems
- 23 the land will not be so dry, the crops will be alive and healthy, and the farmers can continue
- 24 making money by selling crops.
- 25
- 26 Draws attention to how much money we are asking for, which is 5 million dollars.
- 27
- 28 Further reminds that irrigation systems roughly cost around 130 dollars and there are about
- 29 32,000 farms in El Salvador which will cost that will cost about 4,160,000 dollars.
- 30
- 31 Proclaims the wells are going to be 150 feet deep and It' s about 25 dollars per foot so for
- 32 the wells we need 3,750 dollars.
- 33
- 34 Further proclaims that there are not going to be as many wells as there are irrigation

9 Distressed that nearly half of global plant species are endangered, and one-third of all
10 cacti are in the same dire state, the majority of this endangerment caused by illegal
11 plant trafficking, highlighting the need for a global coalition against this atrocious
12 practice,
13
14 Seeing that most of the world overlooks the critical issue of plant trafficking when
15 considering the causes of plant endangerment and stress on the global ecosystem,
16
17 Concerned that recent events such as Operation Atacama, an arrest that uncovered a
18 black market of over 1,000 endangered cacti, reflect the magnitude of plant trafficking
19 worldwide,
20
21 Cognizant that the issue of plant trafficking is displayed in varying degrees across the
22 globe, and that a significant portion of this global stress is affiliated with the difficulties
23 that orchids face from plant smuggling,
24
25 Worried that plants can take decades or centuries to reach their full healthy state, and
26 that plant trafficking undermines this growth,
27
28 Further recalling that Cacti have extraordinarily limited habitats, making their
29 endangerment even higher and their rarity increasingly appealing to plant traffickers,
30
31 Alarmed by evidence revealing prices for trafficked plants upwards of 10,000 USD,
32 providing illicit incentives to smugglers,
33
34 We the delegates of Peru do hereby:
35
36 Implore the United Nations to assemble a global task force charged with the
37 enforcement of plant trafficking laws, the protection of threatened plants and the

38 associated replanting when harm has been done, and the education of the public
39 regarding the necessity of protecting endangered plants,
40
41 Urge for the establishment of national reserves in Peru with the intention of preserving
42 the natural habitats of endangered plants and cutting off the supply available to
43 smugglers,
44
45 Encourage the United Nations to recognize the stability that seed vaults give
46 endangered plants and consider the implementation of a seed vault in a geographically
47 stable landscape to ensure that these beautiful and environmentally essential plants are
48 preserved even if they become extinct in the wild,
49
50 Request a total of 225.58 million USD to implement the previously stated actions to
51 better protect cacti and other plants that are essential to maintaining healthy
52 biodiversity on earth.
53
54 Aspire to improve the predicament of endangered cacti in Peru and other nations by
55 protecting their habitats from plant traffickers with the assistance of the United Nations.

A Resolution to Keeping Human Capital in Country of Origin

- 1 To the General Assembly:
- 2
- 3 Recognizing that the issue of human capital flight or "brain drain" has become a
- 4 significant problem in the Republic of Poland and other Baltic States.
- 5
- 6 Acknowledging that the flight of human capital primarily impacts highly-skilled and
- 7 educated workers.
- 8
- 9 Emphasizing the urgency of this matter, as it has already caused and could eventually
- 10 cause a rapid political and economic decline in the Republic of Poland and other nations
- 11 struggling because of the issue of "brain drain."
- 12
- 13 Aware that according to a study done by the European Committee of the Regions, "In
- 14 2017, nearly 580,000 highly educated Poles lived in another EU country, which is the
- 15 highest total among the 28 EU member states."
- 16
- 17 Concerned that the problem is due to several factors, including a low fertility rate, a
- 18 high median age in the labor force, high unemployment, labor shortages, and a lack of
- 19 investment in technology companies that provide high compensation employment.
- 20
- 21 Fully aware that the problem is widespread, affecting many countries around the world
- 22 such as Samoa, Jamaica, Somalia, Eritrea, El Salvador, Albania, and Guyana, all of
- 23 which will require assistance to counteract the impact of "brain drain."
- 24
- 25 Acknowledging that the Republic of Poland has taken steps to combat the problem,
- 26 such as eliminating the personal income tax for young employees across the nation that
- 27 earn less than 22,000 USD, or 87358.70 Polish zloty, per calendar year.
- 28
- 29 The General Assembly hereby:
- 30
- 31 Calls upon member nations to aid nations plagued by the
- 32 issue of human capital flight in the form of assistance to incentivize technology
- 33 companies and other companies to locate operations in countries suffering from human
- 34 capital flight
- 35
- 36 Calls upon member nations to expand the UNCTAD (United Nations Conference on

Eliminate Pollution in the South Pacific Islands

- 1 Recognizing that recently, the Singapore government unveiled the Singapore Green
- 2 Plan 2030 which is a nationwide movement to advance Singapore's national agenda on
- 3 sustainable development and features five key pillars: City in Nature, Sustainable
- 4 Living, Energy Reset, Green Economy and Resilient Future.
- 5
- 6 Reminded that Singapore's green efforts originated in the late 1960s when the country
- 7 was undergoing rapid industrialization and urbanization.
- 8
- 9 Acknowledging that climate change is a global challenge, and Singapore is taking
- 10 firm actions to do their part to build a sustainable future.
- 11
- 12 Concerned that in 2019, the pollution of PM10 in Singapore increased by one point to
- 13 30 microgram per cubic meter despite Singapore's air quality target by 2020 to bring
- 14 the PM10 level below 20 gram per cubic meter in the annual mean.
- 15
- 16 Taking into consideration that over the past few years, Mighty Earth has emerged as
- 17 one of the most influential advocacy groups involved in pushing companies to clean up
- 18 their supply chains. The group has targeted companies that produce, trade, and source
- 19 deforestation-risk commodities like beef, palm oil, cocoa, rubber, and soy.
- 20
- 21 Viewing with alarm that the South Pacific has increasingly been facing severe climate
- 22 impacts including sea-level rise, changing temperature and rainfall patterns.
- 23
- 24 Appreciating that in response to climate change in the southern pacific islands,
- 25 communities in the region are leading climate adaptation strategies, often combining
- 26 traditional practices and cutting-edge science, to build the resilience of their
- 27 communities and ecosystems in the face of increasing climate risk. For example,
- 28 communities are implementing resilient networks of marine protected areas using the
- 29 best available science and strengthening tribal governance to manage these networks,
- 30 experimenting with salt and drought tolerant crops, revegetating coastlines with native
- 31 salt-tolerant plants, revitalizing traditional wells, and implementing climate-smart
- 32 development plans.
- 33
- 34 Taking note that Pacific Island leaders, along with leaders from other Small Island
- 35 Developing States (SIDS), have been instrumental in shaping climate policies and the
- 36 Paris Climate Agreement (UNFCCC, 2015).
- 37
- 38 Drawing attention to the fact that Southern pacific islands including Singapore have
- 39 had to take drastic measures just to make their island a clean and safe environment.

40 Affirming that Singaporeans are trying to produce 30% of their energy needs by 2030.
41
42 We, the Delegation of Singapore do hereby:
43
44 Call upon the United Nations to support the South Pacific governments in determining
45 appropriate measures that produce a clean environment for everyone.
46
47 Confirm that key targets include: planting 1,000,000 more trees in the region,
48 quadrupling solar energy deployment by 2025, reducing the waste sent to landfills by
49 30% by 2030, and requiring that all newly registered cars be cleaner-energy models by
50 2030.

A Resolution to Fund for Advanced Doctors in Liechtenstein

1 Deeply Concerned that the country of Liechtenstein doesn't have the basic and
2 advanced healthcare they need;
3
4 Alarmed by the fact that citizens could become ill from diseases like Hepatitis B,
5 Coronavirus, Influenza, and Encephalitis with only one hospital available in the country;
6
7 Bear in mind the fact Liechtenstein isn't a part of the World Health Organization, and
8 only has enough Covid 19 vaccines for 61.5% of the population;
9
10 Acknowledging citizens have to travel to countries like Switzerland and Austria with
11 agreement to Liechtenstein's government for more advanced healthcare;
12
13 Taking into account it will take another 111 days to administer enough covid 19
14 vaccinations for another ten percent of the population;
15
16 We the Delegates of Liechtenstein do hereby:
17
18 Request the UN to fund for advanced doctors to teach and assess the healthcare
19 workers in Liechtenstein;
20
21 Call Upon the United Nations to help fund for at least fifteen advanced doctors, so
22 citizens won't have to travel to different countries for special care;
23
24 Note that six million(USD) will provide enough money to pay fifteen specialist doctors
25 for a year in Liechtenstein, so citizens who are infected by covid 19 or have other
26 medical issues are given special care.
27
28 In Conclusion there will be more Covid 19 infections and other medical cases which

A Resolution to Combat the Drug Trade and the Effects it has on Other Nations

- 1 To the General Assembly:
- 2
- 3 Noting with grave concern about the amount of drugs and illegal products going
- 4 through Brazil's borders, the drugs that have been passing through Brazil's borders are
- 5 from the lack of adequate security along the border,
- 6
- 7 Convinced this is due to the many back roads since the majority of the border is made
- 8 up of rainforest,
- 9
- 10 Concerned there is little to no security throughout the borders, even at the main roads
- 11 where native and foreign citizens are smuggling illegal products,
- 12
- 13 Acknowledging that in 2020 Brazil spent 25 billion USD on their government run
- 14 military out of the 27 billion USD budgeted per year (in 2013),
- 15
- 16 Taking into consideration the drugs (i.e. cocaine) pass through the borders is causing

- 32
- 33 Encourages the world to reduce corruption in the current government by holding fair

- 35 elected government. According to World Population Review, 73% of all democratically
- 36 elected countries have a "government score" of over 5 out of 10;
- 37
- 38 Further invites the building of new, and advanced air technology like AKASH Missile

 43
 44 Further requests for more troops from around the world due to the lack of a military

- 7 person who consumes it,
- 8
- 9 Bearing in mind farmers have to be extremely cautious when doing this because one
- 10 can be stopped and arrested at any time for selling or growing this substance,
- 11
- 12 Fully aware most of the cocaine produced in Colombia ends up being transported and
- 13 sold in the US, so if this problem could be solved, then, it would benefit not only
- 14 Colombia but also the USA and other major buyers,
- 15
- 16 Noting further most areas of Colombia that produce cocaine are remote and don't have
- 17 many other options to produce income, this is one of the other main driving forces for
- 18 coca leaf production, the lack of variety for other jobs, a majority of the residents are
- 19 in remote villages centered away from society,
- 20
- 21 Recognizing that transportation is an additional problem which needs to be resolved, one
- 22 eighths of the roads are paved which has caused people in remote areas to have more
- 23 trouble connecting with the outside world, main transport of cocaine and other illegal activity
- 24 comes from the Darién Gap, an area that separates Colombia and Panama, the Gap cuts off
- 25 all communication between the two countries, making it easier to transport illegal drugs,
- 26
- 27 The Delegation of Colombia hereby:
- 28
- 29 Recommends a plan to fix this is by implanting checkpoints or influencing higher
- 30 security around that area;
- 31
- 32 Calls upon the UN to create a task force to bring supplies and teach the people how to
- 33 plant and produce coffee beans instead of coca leaf;
- 34
- 35 Recognizes Columbia already exports coffee beans and is second only to Brazil;
- 36
- 37 Has resolved to move jobs from coca leaf production to coffee bean production;
- 38
- 39 Expresses hope that this would allow Colombia to have a more legal economy with the
- 40 coffee bean.

A Resolution To Reduce Air Pollution In Chile

- 1 Alarmed that, Chile's air pollution is an under-managed issue and if not dealt with will
- 2 damage the health of its citizens dramatically.
- 3
- 4 Concerned that the air pollution is mostly caused by the lumber industry, whose
- 5 machinery allows fumes to escape into the atmosphere and degrade the quality of the
- 6 air, not only that but many homes rely on the wood and use it frequently.
- 7
- 8 Noting that every year in Chile, air pollution causes 127,000 emergency health
- 9 consultations and more than 4,000 deaths, which costs the medical industry at least
- 10 \$670 million dollars
- 11
- 12 Recognizing the pollution is linked to cardiovascular and respiratory diseases; it also
- 13 causes reduced lung function and an increased risk of heart disease.
- 14
- 15 We the Delegation of Chile hereby:
- 16
- 17 Call for the United Nations to assist with Chile's air pollution by helping to fund
- 18 replacements for wood heaters with gas and electric ones, help to add more efficient
- 19 filters on Chile's factories to help reduce their pollution emitted, and to reduce reliance
- 20 on the lumber industry by helping to fund expansions into more efficient and ecosystem
- 21 friendly alternatives.
- 22
- 23 Furthermore, if any factory fails to comply with the new standards mentioned
- 24 previously, they are liable for expenses or lawsuits for endangering the health of
- 25 citizens.
- 26
- 27 Funding the mentioned gas stoves would cost around a maximum of \$3,653,250 for
- 28 every 200 houses per mile, this includes every mile of Chile, some of which are
- 29 mountains and forests and have no houses at all. but if we estimate that 1 in every 11
- 30 miles are unoccupied, that would mean that 32,148 miles are currently unused and the
- 31 cost would be \$3,321,136 in total.

A Resolution to Get Clean Drinkable Water to the Afghanistan Population

- 1 Concerned by the bacteria in the drinking water of Afghanistan.
- 2
- 3 Alarmed by the fact that hazardous drinking water can decrease the life expectancy of
- 4 citizens of Afghanistan.
- 5
- 6 Remembering that these affect the population of Afghanistan by having non-drinkable
- 7 water which lowers the life expectancy along with symptoms such as persistent
- 8 headaches, sluggish bowel function, dull skin, fatigue, weight gain, and a dry mouth.
- 9
- 10 These are all terrible for the Afghanistan population.
- 11
- 12 Bearing in mind that the population continues to decline because of unclean water and
- 13 will continue to worsen as time goes on.
- 14
- 15 We the delegates of Afghanistan request:
- 16
- 17 The United Nations 35 million U.S. Dollars to build our country a new filtration system
- 18 with 1 filter in each province/state.
- 19
- 20 These filters will cost from 500,000 to 1.5 million US dollars for all the equipment,
- 21 building, and startup, so we would need around 35 million dollars to get everything up
- 22 and running.
- 23
- 24 Along with directors to direct the building of these new filtration systems and builders
- 25 to implant the systems.
- 26
- 27 We need filters that will cost 35 million US dollars and that will cover all of the
- 28 equipment, building, and startup, which will solve the problem of infected water and
- 29 increase the life expectancy of an average Afghan citizen.

A Resolution to Address the Worsening Education Crisis Faced by Nations in the Aftermath of Civil Wars and Coups d'état

1 Expressing grave concern that the Republic of Liberia and other nations in sub-Saharan
2 Africa have suffered decades of education crises arising from political instability as a
3 result of civil wars and coups d'état,
4
5 Noting with regret that the 1980 coup d'état precipitated years of conflict, consisting
6 primarily of the first and second Liberian Civil Wars, which resulted in the destruction of
7 much of the educational infrastructure, where about 60 percent of school buildings,
8 including water and sanitation facilities, were destroyed or rendered inoperable,
9
10 Bearing in mind that during the 14 years of devastating civil unrest, the Liberian
11 education system battled a devastatingly low literacy rate of a mere 28 percent, with
12 nearly 800,000 children driven out of school and thousands of teachers fleeing the
13 country or taking up alternative employment to survive during the war,
14
15 Expressing deep concern that serious fundamental challenges continue to plague the
16 process of rebuilding Liberian educational systems, as well as those of neighboring
17 countries, with about only 56 percent of Liberian schools having safe drinking water and
18 functional sanitation facilities, resulting in an atrocious female literacy rate of 34.1
19 percent, and only 54 percent of children completing primary education,
20
21 Acknowledging the United Nations International Children's Emergency Fund (UNICEF)
22 report on the long-lasting effects of civil wars in Liberia, which includes one of the
23 highest proportions of children missing out on primary and secondary school education,
24 with an estimated 15 to 20 percent of 6–14 year-old children not in school, about 36
25 percent of primary teachers and 29 percent of secondary instructors deemed
26 unqualified, and the vast majority of students being over-age for their grade and
27 therefore at high risk of dropping out,
28
29 Alarmed by the fact that one in six children of school-going age in Liberia and other
30 surrounding sub-Saharan African countries are exposed to serious human rights
31 violations and are engaged in the worst forms of child labor, including forced domestic
32 work, slavery, physical labor in dangerous and inhumane conditions such as the
33 production of rubber and mining, and child trafficking from Liberia to other countries
34 such as Côte d'Ivoire, Guinea, Nigeria, and Sierra Leone,
35
36 Emphasizing that multiple socioeconomic factors, such as the cost of uniforms,
37 transportation, books, and school supplies, in addition to the shortage of teachers,
38 insufficient learning materials, a lack of educational facilities, and inadequate

39 transportation, severely impact the equitable access to education for children from
40 economically disadvantaged families in sub-Saharan Africa,
41

42 Profoundly concerned that the COVID-19 crisis has exacerbated the pre-existing
43 education disparities in many other conflict-affected African nations including Ethiopia,
44 Mali, Sudan, Gabon, Equatorial Guinea, Zimbabwe, Gambia, Libya, Burkina Faso, and
45 Burundi,
46

47 The General Assembly Hereby:

48 Expresses its deep appreciation of the UN resolution 70/1 of 25 September 2015,
49 entitled "Transforming our world: the 2030 Agenda for Sustainable Development", in
50 which it committed to providing inclusive and equitable quality education at all levels —
51 early childhood, primary, secondary, tertiary, technical, and vocational training;
52
53

54 Recognizes the efforts made in the aftermath of civil wars by the Liberian Ministry of
55 Education, UNICEF, and other educational partners in continuing to repair and build
56 new classrooms, train teachers, revise curricula, and develop sustainable policies for
57 the education sector in the Republic of Liberia;
58

59 Calls upon the United Nations and relevant non-governmental organizations (NGOs) to
60 support funding and strategizing a comprehensive education system in sub-Saharan
61 Africa, with an emphasis on keeping children and students in the system and providing
62 inclusive and equitable quality education to all children in the region;
63

64 Requests the UN Member States and the private sector to contribute generously in
65 establishing a sustainable education system across sub-Saharan Africa, including
66 collaborative projects such as building new water and sanitation facilities in schools,
67 while addressing gender inequality by launching a social movement through public
68 campaigns and advocacy;
69

70 Requests further UNICEF assistance in addressing the exceedingly low literacy rate
71 across the continent by implementing programs to improve the efficiency and standards
72 of the teaching workforce by providing professional development
73 training and certification programs for teachers, in addition to universal access to
74 quality instructional material;

75 Affirms the Liberian government's commitment to increasing educational opportunities
76 for children by strictly enforcing the existing child labor laws and regulations,
77 significantly increasing the number of worksite inspections, diligently
78 prosecuting child labor perpetrators, and mending the loopholes in Liberia's child
79 protection legal framework by repealing unacceptable laws that allow a one-year break
80 during the compulsory education age, or allow children younger than 15 to engage in
81 part-time employment;
82

83 Encourages participation from all Member States and relevant organizations of the
84 United Nations system in strategizing robust educational projects to battle the COVID-
85 19 impact on education by providing distance education platforms through radio, TV,
86 messaging, online learning, and printed materials, and facilitating quality teaching
87 materials including catch up classes and accelerated education programs to integrate
88 overage learners into the education system;
89
90

91 Urges United Nations Educational, Scientific, and Cultural Organization (UNESCO) to
 92 mandate key operational guidelines for the implementation of disaster risk reduction
 93 policies and strategies, during all phases of planning, design, construction, and
 94 reconstruction of educational facilities, and to ensure specific measures for a swift post-
 95 conflict recovery including early access to education in the aftermath of emergencies;
 96
 97 Requests the Secretary-General to bring the present resolution to the attention of all
 98 Member States and to stress that the cost of all programs that may arise from the
 99 implementation of the present resolution should be met from voluntary contributions
 100 from the Member States, organizations of the United Nations system, the private
 101 sector, and non-governmental organizations, to ensure funding and infrastructural
 102 investments for achieving sustainable educational goals during and in the aftermath of
 103 humanitarian emergencies, such as civil wars and coups d'état.

A Resolution to Build Schools Across Niger

1 Disturbed that there are barely any schools in Niger.
 2
 3 Concerned that Niger has one of the lowest literacy rates in the whole world.
 4
 5 Fully aware that this is causing children or young adults to not have an education.
 6
 7 Emphasizing that this causes further problems later in life like not being able to find
 8 jobs.
 9
 10 We call upon the UN to provide a donation of 35 million dollars to create 440 schools
 11 across Niger.
 12
 13 Resolving to use 5 million dollars for the building of schools. 10 million dollars for school
 14 supplies, and 20 million dollars for hiring employees.
 15
 16 Mindful that we are also going to be able to create job openings for adults with a better
 17 education system in Niger.
 18
 19 Having noted this will help all the children in Niger so they can get a good education
 20 and they can get a stable job when they are older.
 21
 22 Reminding that this can also help the adults with education get a job because we can
 23 hire them to teach in our new schools.
 24
 25 Urging the UN to support this resolution to help the citizens of Niger now and in the
 26 future.

A Resolution to Address the Kenya Water Crisis

- 1 Noting with grave concern that 16 million people lack access to clean water. Numbers
- 2 are decreasing but at a terribly slow rate and we need to speed that up or everyone in
- 3 Kenya might not have water until 2030 or worse.
- 4
- 5 Noting that the capitol of Kenya is Nairobi. Kenya has about 53 million people (about
- 6 twice the population of Texas) living in Kenya. Kenya's government is a representative
- 7 democracy. Kenya's GDP is about 98 billion USD as of 2020. The religion in Kenya
- 8 consists of Muslim religion and Christianity.
- 9
- 10 Aware of the 16 million people (about the population of New York) who lack access to
- 11 clean water daily, they sometimes must travel miles just to get water.
- 12
- 13 Fully aware that the UN has helped a little bit with giving some money to the lack of
- 14 water in Kenya, but they are still struggling.
- 15
- 16 Keeping in mind that people in Kenya have freedom but some only make \$3.50 and are
- 17 unable to provide clean water for themselves and some do not have education either.
- 18
- 19 Expecting more clean water wells, although Kenya has been receiving some, but not
- 20 enough considering that there are still 16 million people without access to clean water.
- 21
- 22 We the delegation of Kenya do hereby:
- 23
- 24 Draws attention to the UN Social, Humanitarian and Cultural Committee that Kenya
- 25 needs more access to wells and clean water we need to negotiate a way to plant more
- 26 wells in Kenya so people in Kenya have access to clean water.
- 27
- 28 Seeking that the UN Social, Humanitarian and Cultural Committee helps by donating to
- 29 foundations in Kenya that build wells such as The Water Project or we can start our own
- 30 foundation and hire workers to build wells. We would recommend donating money to
- 31 The Water Project so they can install wells in Kenya so we can cut the people missing
- 32 water from 16 million to 0.
- 33
- 34 Desiring the UN will be able to give us the 300k we need. This would give us the ability
- 35 to install 54 wells in Kenya which would cut the amount of people in Kenya missing
- 36 water from 16 million to 2 million, maybe even 0. In conclusion Kenya would really
- 37 appreciate any money given toward well foundations.

- 13 illiterate and where college graduates are challenged with finding gainful employment,
- 14
- 15 Fully believing that deficient employment percentages raise concerns for other United

- 18 main source of economic stability,
- 19
- 20 Emphasizing that the COVID- 19 pandemic has placed a strain on the countries already

- 22
- 23 Acknowledging that severe healthcare issues have increased in recent years, such as

A Resolution to Decrease High Crime Rates Throughout Honduras

1 We, the government of Honduras, are aware of the importance of all the crimes and
2 deaths that have occurred in our country, and are here to present solutions to this
3 problem.
4
5 Keep in mind, we are working hard and long to solve this catastrophic problem. It will
6 take a little while due to the state of our economy, but one day we will be back to a
7 peaceful country.
8
9 Acknowledging that Honduras is the second most dangerous country world wide.
10
11 Noting in concern, we have a homicide rate of 56.52% per 100,000 people living in the
12 country. According to statista.com, "In 2020, a total of 3,496 homicides were registered
13 in Honduras, a decrease of around 14 percent when compared to the 4,082 cases
14 registered a year earlier."
15
16 Emphasizing this, we want you to realize that this is a disturbing number of deaths that
17 have happened in our nation, and we are working to stop these high casualties each
18 year.
19
20 Noting this with satisfaction, we are going to move forward with confidence and
21 precision.
22
23 Deeply conscious, we recognize this problem and are working efficiently to stop this
24 problem.
25
26 We the Delegation of Honduras do hereby:
27
28 Call upon the United Nations to end this conflict and present our solutions to this
29 worldwide problem.
30
31 Having decided that if it works for our country, it will work for violence all around the
32 globe.
33
34 We realize that the UN agency in Central America will be able to help this solution to
35 become more widespread as well.
36
37 We can look at The Peace and Justice Project, and are encouraging others to help as
38 well.

39 This is a legal NGO group, which has saved over 600 lives in the last 10 years. It also
40 has helped drastically lower the overall homicide rate.

41
42 We draw attention to our solution and we suggest that we raise our prices on popular
43 exports we have.

44
45 This includes things like bananas and coffee.

46
47 In raising the prices, we will be making more money for our poor country.

48
49 Committing to this plan we will then hire more police force and train them.

50
51 Expressing our hope to lower the violence in our country.

52
53 We further proclaim that we also hope that these newly trained policemen will help with
54 the police brutality that we have within our country.

55
56 We also enforce periodical house checks for suspicious activities.

57
58 Emphasizing that these will be for everyone including our police force.

59
60 We will seek to get police stationed at ports and anywhere where we have things
61 leaving the country.

62
63 They will be monitoring what is coming out of our country and what is coming in.

64
65 Noting, this is to reduce weapons and any other dangerous thing from entering our
66 country.

67
68 We genuinely believe that this will help improve our police system and trade routes
69 amongst the country.

70
71 Improving the police system will help end police brutality and enforce better laws to
72 end violence and murder.

73
74 If we have more secure trade routes, then we can limit gun and weapon shipment into
75 the country, henceforth limiting worldwide violence problems.

76
77 Having resolved our issue, the government will take action and soon everything will all
78 be back in order.

79
80 Further requests will be taken into consideration, but we believe we have found the
81 solution to our catastrophic problem.

A Resolution to Protect Papua New Guinea's Indigenous Animal Populations

- 1 Concerned by the fact that the country of Papua New Guinea's economy is heavily based
- 2 on tourism income which has been continuously decreasing over the past decade.
- 3
- 4 Keeping in mind the tourism is due to the fact that Papua New Guinea is full of thousands
- 5 of extraordinary creatures that most people in the world haven't even heard of.
- 6
- 7 Acknowledging that these animals are rapidly decreasing in population due to
- 8 bloodthirsty tribesmen and lack of care for the animals well being and health.
- 9
- 10 Hurting knowing that the civilians of Papua New Guinea are suffering due to their
- 11 Governments lack of seriousness on this subject, thinking that it's just a slight
- 12 inconvenience not putting the people in mind and realizing how much of a major
- 13 inconvenience it is in their daily lives.
- 14
- 15 Deeply concerned that some of these creatures that are only native to this island are on
- 16 their last leg and their numbers are only in the hundreds and there has been no help or
- 17 word of even word of help in replenishing these numbers professionally.
- 18
- 19 Mindful that replenishing the numbers of wildlife won't completely repair the tourism
- 20 income deficit, because people are still cancelling their flights due to fears of being
- 21 attacked or trafficked by many of their gangs and tribes as well as fears of contracting
- 22 diseases which are thriving within the walls of the country.
- 23
- 24 We the Delegation of Papua New Guinea do hereby:
- 25
- 26 Call upon the United Nations (UN) to end this affliction by funding animal sanctuaries to
- 27 guarantee that the decreasing numbers of animals and the absence of care for wounded
- 28 animals will no longer be an issue to Papua New Guinea.
- 29
- 30 Requests that the UN will send in trained veterinarians as well as the donation of 30
- 31 million dollars to help construct sanctuaries for the animals requiring maintenance, plots
- 32 of land, and installation.
- 33
- 34 Note that we will need at least 400 animal sanctuaries to supply homes and shelter to
- 35 these creatures in order to put an end to this cruelty.
- 36

A Resolution to Improve Quality of Life in Samoa

- 1 Noting with concern that Samoan poverty is at an all-time high of 26.9 percent of
- 2 people below national poverty line, we are also experiencing various difficulties with
- 3 climate change inside of our country Over 85 percent of people live on less than \$30
- 4 per day the 10 percent of extreme poverty live on less than \$1.90 per day;
- 5
- 6 Concerned that our small population of 202,506 and that 25 percent of people in
- 7 Samoa do not have access to clean drinking water most Samoans do not have access to
- 8 education, hospitals, health, and sanitary in rural communities;
- 9
- 10 Deeply concerned by how important agriculture is in the Samoan culture and life,
- 11 Samoa's rapid climate change has resulted in expanded periods of drought, destroyed
- 12 land, overall loss of fertility on Samoan land and deeper agricultural issues these
- 13 factors affect many farmers who only farm for money, our government, and food
- 14 security tropical cyclones bring in flooding and winds that will damage crops;
- 15
- 16 Acknowledging that the UN has claimed to have an everlasting mission for Samoa, we
- 17 still need money considering our current circumstances Some of these circumstances
- 18 have to do with the rise of sea level most of the prime agriculture is on coastal plains
- 19 which are threatened by sea level rise;
- 20
- 21 Acknowledging that Samoa's seasons affect its agriculture is important during
- 22 December and February is when tropical cyclones usually happen between December
- 23 and February Samoa is in a region that is known for frequent tropical cyclones These
- 24 damaging winds, rains, and storm surges have frequent occurrences in October;
- 25
- 26 Further claiming Samoan temperatures have been skyrocketing and so has the large

A Resolution to Decrease Crime, Drug Use and Abduction in Mexico

1 Being deeply concerned that in 2019 it is estimated that 1,323 abduction cases were
 2 reported that is around 4 people abducted a day
 3
 4 Alarmed that 465,00 people were reported homeless in Mexico and no one checks up
 5 on a day to day basis
 6
 7 Noting with concern in 2020 it was reported that 36,579 murder cases were filed in
 8 Mexico
 9
 10 Recognizing that drug use has increased notably, especially in the last 3 years, from
 11 15.2 percent to 17.8 percent
 12
 13 Taking note that drug use in Mexico City is higher than in other states of the country.
 14
 15 We the delegation of Mexico do here by:

- 1 To the General Assembly:
- 2
- 3 Noting with a grave concern the risks of possible covid-19 exposure during international
- 4 travel, specifically inside commercial airlines.
- 5
- 6 Bearing in mind that international travelers have a 40% higher risk of catching Covid-19.
- 7
- 8 Deeply concerned that the current regulations against the spread of Covid-19 are limited
- 9 to airline mask mandates and vaccination/testing requirements of individual countries.
- 10
- 11 Recognizing that Australia and New Zealand currently have high regulations, and have
- 12 prevented the spread of COVID-19.
- 13
- 14 Emphasizing the negative impact of Covid-19 on livelihoods and the disruption to
- 15 economies as recognized in the Omnibus Resolution - Comprehensive and Coordinated
- 16 Response to the Covid-19 Pandemic
- 17
- 18 Noting that in 2019, 126.17 million people visited Spain and tourism accounted for
- 19 greater than 5% of GNP and therefore is a major driver of the Spanish economy.
- 20
- 21 Cognizant that the Covid-19 pandemic has negatively impacted tourism and economies

A Resolution to Solve Global Water Crisis

1 Concerned that the water quality in Haiti is deteriorating rapidly due to Haiti's continued
2 misfortune in terms of weather and natural disasters,
3
4 Acknowledging there are illnesses and diseases that spread through the water they
5 have, which cause people to get diseases like Cholera and bacillary dysentery,
6
7 Drawing attention to the fact that their fresh water sources are so few, this is impacting
8 hygiene, hydration, and any other uses for water,
9
10 Expressing with concern, life in Haiti is already hard enough, with all the major
11 problems they have, but having sickness spreading is even harder,
12
13 Noting with concern that according to UN.org, 1 in every 3 people do not have access to
14 clean water,
15
16 Recalling that they have approached solving this with their "Goal 6: Clean Water and
17 Sanitation" Covid-19 has increased the need for clean water and hygiene,
18
19 Considering that it is not just our country struggling with a shortage of clean water, this
20 is affecting around 700 million people including Ethiopia, Somalia, and Angola, The
21 Dominican Republic of Congo, and many more struggle with similar issues,
22
23 Emphasizing that our goal be that every country can implement our clean water
24 initiative,
25
26 We the Delegation of Haiti do hereby:
27
28 Call upon the United Nations to approve our plan to improve water quality,
29
30 Further proclaiming the plan is setting a global health standard for water that all the
31 countries struggling with fresh water quality will follow,
32
33 Take note that we will set aside a certain amount of money, based on their individual
34 needs of the countries yet Haiti would be our example/trial,
35
36 Having decided that this plan would include fresh water stations throughout the country
37 and a water purification plant for every 250 miles,
38

39 Bearing in mind that fresh water stations are places where people can access fresh
40 water free of cost with proper and legal identification,

41
42 Recognizing that the total cost of our plan is not definite yet. It costs \$500,000 to \$1.5
43 million to build a water purification plant, but the cost overall will depend on the square
44 mileage of the certain countries struggling,

45
46 Declaring that our plan further proclaims that we would also implement a protection law
47 over certain lakes, rivers, waterfalls, and other natural freshwater resources, to keep
48 them clean and healthy,

49
50 Confirms that this resolution would be affecting the top 20 impoverished countries and
51 Haiti,

52
53 Keeping in mind that this plan shall take to effect on January 1, 2022.

54
55 We, the delegates of Haiti, call upon the United Nations Assembly to pass this
56 resolution.

A Resolution to Starvation and Poverty in Sub-Saharan Africa

1 Alarmed that many sub-Saharan countries have been on a track of increasing poverty
2 since the end of World War Two,
3
4 Deeply concerned that Nigeria's poverty rate as of 2020 is 83 million or about 40% of
5 the country's population according to The Nigerian National Bureau of Statistics, and as
6 of 2021 it is estimated that about 90 million people (45% of the population) will
7 experience poverty in 2022,
8
9 Acknowledging that 3.4 million people are facing hunger and over 300,000 children are
10 suffering from acute malnourishment,
11
12 Further recalling that the number of Nigerians facing starvation doubled over the
13 pandemic and this statistic only grows more worrying over time,
14
15 Recognizing that over half of the country lives below the poverty line, and northern
16 Nigeria suffers the world's third highest level of chronic undernutrition among children,
17
18 Noting further that an average Nigerian household spends about 56% of its income on
19 food, the highest in the world,
20
21 If the World Bank's income poverty threshold of 3.20 USD per day is used, then the
22 poverty rate will drop to 71% of the total population, but compared to other countries
23 such as Mexico, Ecuador, Brazil, and Iran it is still quite high,
24
25 Recognizing that the World Bank has discussed a five year contract with Nigeria. The
26 contract outlines a 1.5 billion USD financing package to support 100 million Nigerians
27 recovering from poverty and the residual effects of the COVID-19 pandemic. The
28 contract has been discussed, but has not been finalized or put into action,
29
30 Noting that the plan will also take another seven years to help 100 million Nigerians
31 recover from poverty,
32
33 Realizing that our plan can be enacted now so when the World Bank's deadline comes it
34 can further support those who are exiting poverty,
35
36 The General Assembly Hereby:
37

38 Calls upon the United Nations Office to the African Union to create an assembly of a
39 League of Sub-Saharan African Nations (via the Regional Coordination Mechanism)
40 centered around the profit gained by the export of produce and crops;
41
42 Further requests that the first order as a United assembly is to provide federally
43 approved land, and land claims to an individual country under the sole purpose of
44 providing an increase of agricultural exports as well as occupations for the large
45 majority of people in poverty;
46
47 Endorsing a federal reserve in which half the profit made by a country at the end of one
48 year is to be donated to said reserve. Each country in the league will receive a portion
49 of the donations;
50
51 Fully aware that the UN has previously funded organizations such as Action Against
52 Hunger to put forth measures to aid the people of Nigeria and surrounding countries,
53 the league is to sponsor and partner with the organization;
54
55 Requests that these organizations clarify as well as state technologies and plans
56 currently active. These organizations must be willing to accept new ideas and opinions
57 to combat starvation and poverty, as well as putting a stop to any ineffective systems
58 which are draining funds going towards the goal;
59
60 Confirms that the total price for the operation will be 28 billion USD.

A Resolution to Make Refugee Camps Better in Libya

1 Fully aware of the rising number of warfare all around Libya, mainly coming from Sudan
2 and Syria, it is continuing to rise day by day, 15,971 refugees came from Sudan and
3 14,412 came from Syria; 519 have died, 3,980 are wounded and over 1,500 were
4 missing, 20,000 have died from starvation and dehydration;
5
6 Acknowledging that the United States has given over 269 million dollars to Libya in the
7 last 2 years to help with war efforts, refugees are still in dire need of support, food,
8 water, and medications;
9
10 Noting with concern that 15.8% of Libya's population are refugees seeking protection
11 and assistance after being forced to flee their homes due to war or violence, what they
12 actually find are unsanitary living conditions and abuse at the hands of officials who
13 should be providing protection;
14
15 Deeply concerned that many people are dying every day because they are not receiving
16 the medical attention and care they need, and the buildings they are staying in are very
17 overcrowded, on average there are 20 people in a small building with very poor
18 essentials like no bathrooms, beat up mats, and torn blankets;
19
20 The delegation of Libya hereby:
21
22 Further proclaims from our problems, we will need refugee camps to aid starvation and
23 dehydration, we feel that this will save lives while also realizing this isn't going to be
24 easy;
25
26 Notes that this will not be cheap, we are making this refugee camp for 6 months
27 hoping, by then, the war will have settled, the cost for just tents will be around
28 \$1,510,150.00, then we need to provide a clear water source by providing 10 wells
29 around the whole camp which will cost about \$15,000.00;
30
31 Further reminds that food is also a very big part of this, food for all 6 months will be
32 \$34,770,000.00, about \$190,000.00 per day; take note that this is for 40,000 people,
33 the food that we use which is inexpensive, portable and easy to make, is called a Meal
34 Ready to Eat (MRE) which is what the United States uses this for its military;
35
36 Fully aware this food caught our attention because we will not need to hire cooks, you
37 just add water then you have a decent meal; each of these meals are about \$6.00 and
38 they have 1,200 calories each;
39

40 Calls upon other countries around Libya, with many refugees, to support the building of
41 these refugee camps to aid starvation, dehydration, and to reduce the number of
42 homeless refugees in Libya;
43
44 Trusts the United Nations to see the urgency of this resolution and to provide the help
45 needed.

A Resolution to Construct Oil Rigs off the Coast of Angola

1 Deeply concerned about the payments demanded by Democratic Republic of the Congo
2 in response to an accidental spill into their rivers.

3
4 Keeping in mind that Angola's economy is collapsing under a rapidly growing
5 population.

6
7 Worried that these demands could lead to a humanitarian crisis if paid with Angola's
8 lack of money, or war if not paid at all.

9
10 We call upon the Model UN to provide a donation of 615 million dollars to construct 3 oil
11 rigs off the coast of the Cabinda Province of Angola. This money will go into paying the
12 workers, of which there will be 540, as well as procuring building materials.

13
14 Resolving to upgrade our economy enough to pay back the Democratic Republic of the
15 Congo.

16
17 Assuming that the oil drawn from the wells will be the amount predicted, we can then
18 pay our debts and bring stability to the country.

19
20 Once finished, the result will be a stable, well-built economy in Sub-Saharan Africa, and
21 lowered oil prices as Angola's oil outputs increase.

22
23 Considering the benefits, this is a bonus for all, as there will be an increase in the
24 world's oil supply and a potential trade partner for many nations.
